Threat Protection Engagement

tierpoint

See how Microsoft Security tools can uncover threats hiding in plain sight.

Engagement highlights

Clarify your security goals and priorities

Uncover active threats and misconfigurations in your environment

Get tailored solution recommendations using Microsoft tools

Jointly develop a strategic plan and list of next steps

Do you know which threats are actively targeting your cloud environment?
Are misconfigurations leaving the door open to attackers?
Do you have a strategy to meet your security needs?

Strengthen Your Security Posture with a 4-Week Threat Protection Engagement

As cloud environments grow more complex and cyber threats become more advanced, protecting your organization is more critical than ever. Many teams struggle with limited visibility, metrics, or staffing to fully understand their vulnerabilities—let alone address them.

This structured 4-week engagement changes that.
Our experts work with your team to assess your current posture, identify real threats across Microsoft 365, Azure, Servers, and Endpoints, as well as develop a clear strategy to strengthen your defenses.

You'll gain visibility into how attackers could target your environment and learn how to leverage Microsoft's powerful security tools to mitigate those risks. You'll walk away with actionable insights, improved confidence in your security strategy, and a plan to move forward. Whether you're just beginning or accelerating your journey, this is a critical first step toward a more secure and resilient organization.

Why you should attend
Given the complexity of today's hybrid environments, it's essential to understand your security posture—and know how to improve it.

By attending, you will:

Identify active threats and risks **across your cloud and on-premises environments**	Walk away with **a tailored action plan** aligned to your goals	Receive documentation to **support stakeholder buy-in**	Learn how Microsoft tools can **reduce costs while providing for a more secure environment.**

What to expect:

This 4-week engagement is delivered in partnership with your team to maximize impact. Each phase builds toward a stronger, more informed security strategy:

- **Kickoff & Discovery**
- **Environment Setup**
- **Threat & Vulnerability Exploration & Product Demonstrations**
- **Results & Next Steps Alignment**

Choose 3+ modular areas to focus on based on your needs – from email protection and endpoint security to identity protection and cloud vulnerability management.

Selectable Module

Email Protection

Selectable Module

Endpoint and Cloud Apps Protection

Selectable Module

Microsoft Copilot for Security Demonstration

Who should attend

The engagement is designed for security decision-makers including:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- IT Security Architects
- IT Security Administrators
- IT Security Operations (Sec Ops)

Why TierPoint?

You need a partner that not only knows the tools – but knows your challenges.

As a Microsoft Solutions Partner with deep expertise in both cloud and cybersecurity, TierPoint helps mid-market organizations take a practical, phased approach to reducing risk.

We bring the people, processes, and platform knowledge needed to deliver outcomes – not just technology. From initial discovery to action-ready security roadmaps, we've got your back.
