

Azure Well-Architected Review

3-Day Immersive Workshop

A Well-Architected review assesses how well the architectural and operational processes align with business expectations and delivers both strategic and tactical opportunities for improvement.

As a proven partner of Microsoft, TierPoint's comprehensive workshop experience provides an end-to-end evaluation of your Azure environment. Our Azure architects then benchmark this assessment against the five pillars of Microsoft's Well-Architected Framework: Operational Excellence, Performance Efficiency, Cost Optimization, Reliability, and Security.

Leveraging a Well-Architected Framework review, companies can:

Confidently build optimized workloads aligned with Microsoft best practices

Gain actionable insights on potential risks, architectural alignment, costs, and opportunities for improvement

Understand deficiencies and prioritize where to focus optimization efforts

Workshop Deliverables

1. Well-Architected Review Assessment
2. Gap Analysis Benchmarked to Microsoft Standards
3. Executive Summary with Prioritized Recommendations
