

Microsoft Catalyst Envisioning Workshop

The Envisioning workshop will help organizations to design a future state for their business and prioritize digital transformation initiatives. Envisioning workshop will help to establish the primary goal for the digital transformation project. Approach used is encouraging to think beyond simply making existing processes more efficient.

Are you thinking how to build more agile business process or resilient supply chain? Or do you want to activate your digital selling or gain more proactive business insights? We are here to help.

Our workshop facilitators will use design thinking concepts to help business decision makers establish Vision and priority goals for the project using an approach that encourages them to think beyond simply making existing processes more efficient.

As an outcome of workshop Understanding of the customer objectives, business challenges, and opportunities for improvement will be documented. And based on those initiatives for Digital Transformation prioritized to be able to plan next steps to proceed with Digital transformation.

The envisioning workshop is run by TietoEVRY. We are a qualified Microsoft Catalyst partner in Norway, Sweden and Finland.

The one-day workshop is free of charge. Timing and location will be agreed individually.
