

## Tiliter Vision AI Agents for Enterprise

*Empowering businesses to move faster, operate smarter, and lead the future with AI Vision.*

### PROBLEM

Across industries, manual processes for identification, quality assurance, and workflow management create inefficiencies, errors, and revenue loss. Businesses need reliable, scalable Vision agents to streamline operations, reduce manual effort, and unlock insights at scale.

### SOLUTION

Tiliter provides a Vision AI Agent platform that empowers companies to automate complex visual tasks - from recognising products and assets, to monitoring quality and optimising processes - all through seamless integration with existing or new camera infrastructure.

### KEY CAPABILITIES

- **Identification:** Accurately detect and track products, tools, equipment, and assets.
- **Quality Assurance:** Automatically detect defects, irregularities, or process deviations.
- **Process Optimisation:** Automate workflows, eliminate bottlenecks, and minimise downtime.
- **Insight Generation:** Analyse vision data to uncover trends, inefficiencies, and opportunities.

### BENEFITS

- **Flexible Deployment:** Works with standard cameras, CCTV, mobile devices.
- **Scalable Integration:** Simple connection into existing enterprise systems.
- **Rapid ROI:** Proven to drive results in as little as 4 months.
- **Cross-Industry Application:** Proven in retail and expanding into logistics, manufacturing, construction, and other sectors.
- **Data-Driven Insights:** Visualise key metrics to make smarter decisions, faster.

### REAL-WORLD IMPACT

- Deployed in retail, with emerging use cases in logistics, manufacturing, and construction.
- Deployed across 1,100+ sites worldwide.
- Delivered millions in operational savings and revenue protection.
