

# Azure Cost Optimizer Package by TimeXtender

It's a comprehensive solution designed to help organizations control, reduce, and optimize their Azure cloud spending through automation, governance, and actionable insights

## Centralized Cost Visibility

**Automated daily ingestion** of Azure billing data into a unified, centralized data model.

**Accurate tagging policies** (e.g. Owner) to ensure traceability and accountability.

**Aggregated cost insights** for the last 30 days, enabling visibility into cloud expenses.

## Cost Governance & Compliance

**Automated identification** of costly inefficiencies such as idle resources or missing tags.

**Custom data quality rules** to enforce compliance with cost management standards.

**Exception management workflows** that assign cost issues to responsible owners & track resolution.

## Proactive Resource Management

**Recommendations** for right-sizing and scaling resources based on real usage patterns.

**Dynamic scheduling** to manage non-production resources and optimize compute/storage tiers.

**Proactive notifications** for resources exceeding cost thresholds or lacking proper ownership.

# Why TimeXtender?

With proven expertise in data automation and cloud optimization, TimeXtender empowers organizations to maximize their Azure investment through automation, governance, and actionable insights, delivering real-world savings and operational improvements

## Typical Results

**20-30% reduction**  
in overall Azure  
spending.

**Up to 40% decrease**  
in development/test  
environment costs.

**Enhanced visibility**  
and control over  
cloud expenditures.

Ready to take control of  
your Azure costs?
