

Autonomous PCI Compliance

ALWAYS-ON ALWAYS-COMPLIANT IN THE CLOUD

Tioga Security automates the implementation of security controls in cloud deployments, allowing financial organizations to switch from only verifying compliance through annual security audits, to implementing an always-on, always-compliant approach, minimizing their exposure to breaches and penalties.

Tioga Security provides compliance managers real time visibility into compliance, supported by evidence from PaaS tools and services, as well as manually uploaded policies & screenshots, guided by best practice recommendations for control implementation.

Main Product Features:

- Enables Continuous and Autonomous compliance
- Introduces a new architectural paradigm
- Supports IaaS, PaaS, and SaaS configurations
- Provides compliance posture scores
- Provides out of compliance alerts
