

Business Central Packages

The Microsoft Business Central Core package offers everything you need to get started in Business Central, covering general ledger, sales to receive and purchase-to-pay. In addition to the Core package, you can choose any add-ons that you might need, building a system that fits your business requirements.

A preconfigured Business Central package is the ideal way forward if you're looking to adopt Microsoft's leading finance software exactly as it comes, using add-ons to make the solution your own, if needed.

Whether you're a small organisation looking to adopt a more formal and efficient way to handle your finances, or a fast-growing SME that has rapidly outgrown its existing finance system (or is close to doing so), a Microsoft Business Central package can meet your needs.

There's no denying that cost is an important factor when it comes to choosing a new finance system, so the package pricing model is ideal for those seeking a more flexible approach to payment, giving you the opportunity to pay in 36 monthly instalments to manage initial costs.

For a full list of add-ons and what they include, please visit [Tisski's dedicated Business Central Packages page](#).

:

Key Benefits

Quick and efficient implementation

With a fixed completion date, you could be up and running with Microsoft Business Central in just one month, gaining a prompt return on investment.

Pay in monthly instalments

Avoid large upfront payments by spreading costs of as little as £405 a month over 36 months with Tisski directly. (Note: this does not include licence and support costs.)

Access the Tisski Toolkit

Tisski have packaged up commonly requested Microsoft Business Central features and enhancements and are offering them as part of the Core package at no extra cost.
