

Dynamics 365 Marketing engagement

As a Microsoft Gold Partner, Tisski can offer a thorough introduction to the Microsoft Dynamics 365 Marketing software. By participating in workshoping sessions, you'll have the chance to explore the tools included in the D365 Marketing platform and discover the benefits the software can deliver to your organisation.

With a D365 expert leading the sessions, you'll have a prime opportunity to get your questions answered, and find out more about how D365 Marketing can be used to address your organisation's specific challenges, as well as how it can help you achieve your goals.

If you do decide D365 Marketing is the right solution for your organisation, Tisski will be there to help implement the software and support its successful introduction to your organisation, with the ability to offer data migration and employee training services, should you need them.

The Tisski team is experienced in guiding organisations through the transition to Microsoft technology – or increasing the extent to which it uses Microsoft solutions – ensuring the process runs smoothly and causes minimal disruption to day-to-day business activity.

Key Benefits

Expert guidance

With the opportunity to interact with our Microsoft experts in workshoping sessions, you can get to know D365 Marketing inside out and gain a true understanding of whether it provides the best way forward for your organisation, before you've invested a significant amount of your time and money.

Streamline your marketing activities

Automate communication with your prospects by introducing a nurturing process that ensures they receive relevant communications at intervals chosen by you – or that are triggered by certain actions – keeping them warm until they become a fully qualified lead.

Encourage cross-team collaboration

With D365 Marketing, your sales and marketing teams can work as one, accessing unified prospect and lead data and taking action based on the information recorded.
