Transform Your Data into Decisive Power

Who We Are: BIntelligenz offers a cloud-based Business Intelligence (BI) solution, delivering enterprise-grade data warehousing with built-in security and data governance on Microsoft's platform. We automate data integration from various business systems, providing actionable insights through over 150 dashboards.

Key Features:
- Integrated Data Model: Offers a 360-degree view of your business.
- Automated Data Processes: From raw data reception to visual dashboard generation.
- Enterprise-Grade Security: Ensures robust data governance and security.

Benefits:
- Informed Decision-Making: Make strategic decisions based on reliable, validated data.
- Efficiency: Access a comprehensive BI solution in less than a month, enhancing operational efficiencies across all business sectors.
- Customization: Tailored dashboards that cater to specific business needs, driving better
outcomes.
