ToCumulus: Fully Managed Cloud Backup as a Service (BaaS)

What we offer

Our Fully Managed Cloud Backup Service is deployed in a dedicated Azure instance, delivering secure and isolated data protection tailored to your business. With enterprise-grade scalability and full automation, our solution eliminates the overhead of infrastructure management, enabling your teams to focus on strategic initiatives while ensuring reliable business continuity.

Key Differentiators

- **Dedicated Azure Instance**

  Your data resides in an exclusive backup environment, ensuring complete isolation and control.

- **Fully Managed Service**

  Offload backup operations and maintenance to our experts, reducing IT overhead.

- **Scalable and Flexible**

  Scale storage as needed without disrupting operations or investing in hardware.

- **Secure by Design**

  Data is encrypted and stored in your Azure tenant, complying with data sovereignty and privacy requirements.

- **Cloud-Native Architecture**

  Built on web-scale, fault-tolerant architecture with self-healing capabilities for maximum availability.

- **Integrated Monitoring and Security**

  Seamless integration with SIEM, SOAR, and syslog platforms for centralized visibility and automated threat response.

Why ToCumulus BaaS?

Proven Expertise

With deep experience in cloud and data protection, ToCumulus delivers reliable, enterprise-grade backup solutions that align with your compliance and business goals.

Streamlined Procurement via Marketplace

Easily subscribe through the Azure Marketplace to simplify procurement, billing, and deployment. Choose from flexible subscription models that align with your budget and needs.

Marketplace Benefits

- Consolidated billing through your existing Azure agreement

- Accelerated deployment with pre-approved pricing

- Meets compliance and procurement policies for most enterprises

Customer-Centric Experience

We prioritize simplicity, automation, and outcome-driven service. From onboarding to ongoing support, our managed service ensures that your backup strategy is effective, efficient, and always aligned with your evolving IT landscape.

Microsoft Azure

Microsoft Azure is a leading cloud computing platform that offers a wide range of services, including compute, storage, networking, and advanced analytics. Trusted by enterprises globally, Azure provides a secure, scalable, and highly available infrastructure to support mission-critical workloads. With built-in compliance, robust security features, and global reach through a network of data centers, Azure empowers organizations to innovate faster, reduce costs, and deliver reliable digital experiences.

ToCumulus

ToCumulus helps enterprises accelerate their cloud and digital transformation journeys by offering secure, scalable, and innovative IT infrastructure and data protection solutions—designed with simplicity and automation at their core.
