TOKIOTA

We help you to get ready for a hybrid work

World is more dynamic today, and companies must be flexible and agile to adapt to a new hybrid work

- Enabling employees to work from anywhere while maintaining productivity and collaboration

- Providing each employees with personalized resources and tools depending on their needs
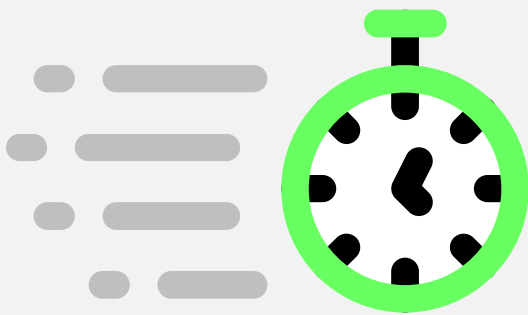

- Creating a secure, scalable and managed environment, no matters where people is working from

- Deploying a constant evolving model, which takes advantage of new tools, way of working and technologies

Windows 365 and Azure Virtual Desktop can help companies to put in place a real hybrid work, but how?

Through a 4 weeks project, we'll analyze your needs, check which technology suits you better and define a real hybrid work strategy for your company

We'll help you to decide between Windows 365 and Azure Virtual Desktop, depending on your current and future needs

- We'll gather and analyze your employee's needs through a workshop
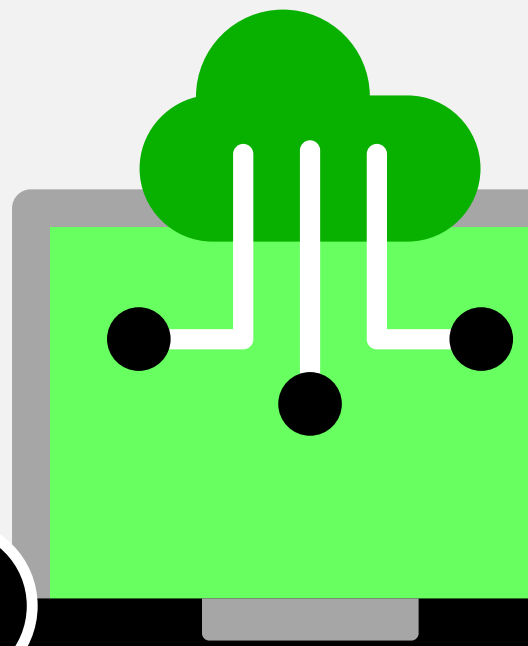

- We'll identify those situations where Windows 365 or AVD can help you

- We'll run a proof of concept with one of the two technologies so you can see the benefits they provide

- We'll define an implementation plan to extend the technology to the rest of your employees

Delivering tangible results for your organization:

- Clear understanding about how Windows 365 or Azure Virtual Desktop can help you to deploy a real hybrid work model

- Proof of Concept of one of those technologies, based on a real use case that'll show how your problems can be solved

- A personalized implementation strategy to extend Windows 365 or Azure Virtual Desktop to the rest of your oragnization
