Up and running in minutes

BENEFITS

Why teams choose SigDaddy

From brand consistency to engagement tracking, SigDaddy transforms your team's email communication.

Total Brand Consistency

Every email from every employee carries your brand. Professional signatures, applied automatically.

- ✓ 15+ professional templates
- ✓ AI-powered signature generator
- ✓ Custom HTML template editor

Zero IT Overhead

No software to install, configure, or maintain. Works server-side — invisible to users.

- ✓ No desktop agents or extensions
- ✓ Works with Outlook, web, mobile
- ✓ Automatic user data from directory

Email Intelligence

Know when emails are read and links clicked. Real-time notifications keep your team in the loop.

- ✓ Open and click tracking
- ✓ Push notifications
- ✓ Smart bot detection

Complete Control

Group-based signatures, user exclusions, per-domain templates — you decide who gets what.

- ✓ User groups with override signatures
- ✓ Exclude specific users
- ✓ Per-email opt-out via category

Dynamic Content

Personalise signatures using live directory data. Add banners, announcements, and OOO messages.

- ✓ 12 merge fields from user profiles
- ✓ HTML snippets & banners
- ✓ Out-of-office smart signatures

Enterprise Security

Your email content never touches our servers. DKIM preserved through secure API delivery.

- ✓ DKIM signature preserved
- ✓ Zero email content stored
- ✓ Full audit trail

HOW IT WORKS

Three steps. Five minutes.

SigDaddy intercepts outbound email, injects your branded signature, and delivers — all in milliseconds.

1

Connect Your Tenant

Sign in with your admin account. SigDaddy configures your mail flow connector automatically.

2

Design Your Signatures

Choose from 15+ templates, use the AI generator, or build your own with the HTML editor.

3

Emails Just Work

Every outbound email is automatically signed. Track opens and clicks from the portal.

MANAGEMENT PORTAL

Everything in one place

Full control over signatures, users, tracking, and analytics from a single dashboard.

Dashboard

Real-time email stats and quick actions

Domains

Manage domains, assign templates

Users & Groups

Active senders, exclusions, groups

Template Gallery

15+ professional designs

AI Generator

Brand analysis & AI signatures

HTML Editor

Custom editor with live preview

Email Analytics

Opens, clicks, and sender stats

Processing Logs

Full audit trail of every email

Push Notifications

Real-time browser alerts

Enterprise-grade protection

Your email content never touches our storage. Processing happens in-memory and delivery preserves your existing authentication.

**DKIM Preserved**

Outbound delivery preserves DKIM signatures and maintains SPF alignment.

**Zero Content Storage**

No email body content is ever stored. In-memory processing only.

**TLS 1.2+ Encryption**

All data encrypted in transit with STARTTLS. Cloud-hosted with encryption at rest.

**Full Audit Trail**

Every email, config change, and user action is logged for compliance.

**GDPR & POPIA Compliant**

Comprehensive privacy policy and data processing agreement available.

**Cloud Hosted**

Enterprise-grade cloud infrastructure with high-availability SLAs.

Requirements

- Cloud-hosted email with Exchange Online
- Business, Enterprise, or Education subscription
- Admin access for initial setup (5 minutes)

TRUSTED PLATFORM

Built for scale. Designed for simplicity.

SigDaddy processes email server-side with no client dependencies. DKIM preserved, signatures injected in milliseconds, delivered seamlessly.

- ✓ Secure API-based email delivery
- ✓ Exchange Online mail flow integration
- ✓ Single sign-on for portal access
- ✓ Auto-scaling infrastructure
