

Napster Learn for Higher Ed.

As the first Proactive Learning System for higher education, Napster Learn embeds AI agents and Faculty Digital Twins directly into the student journey. We bridge the gap between instruction and comprehension by delivering instant 1:1 help, scaling faculty expertise, and giving leaders real-time visibility—ensuring no student slips away.

STRATEGIC USE CASES

03 / Cases

01

Eradicating the “Invisible Student”

Offer 24/7 personalized support in any language that adapts to comprehension levels, closing the learning gap when faculty are unavailable.

02

Reclaiming Faculty Time

Allow professors to focus on deep mentorship and academic rigor by letting their Digital Twins handle repetitive, foundational questions.

03

The Pulse of Learning

Provide administrators with real-time “Retention Intelligence” and curriculum audits to identify exactly when, where, and why students struggle.

VALUE PROPOSITION

05 / Pillars

01

FACULTY DIGITAL TWINS

High-fidelity AI clones of professors that ingest lectures and syllabi to master specific curriculum and teaching styles.

02

A CREW OF COMPANIONS

Give students access to a specialized, on-demand crew including Learning Mentors, Career Coaches, and Wellbeing Guides.

03

CONVERSATIONAL COURSES

Upload existing course material to create interactive learning experiences 10x faster, transforming static content into dynamic dialogue.

04

TOTAL IP OWNERSHIP

100% of the data, analytics, and interactions generated by the Digital Twins remain the intellectual property of the university.

05

PROACTIVE CONNECTION

AI check-ins that engage employees continuously through context-aware conversations, rather than passive modules.
