

Turn any URL into a video AI agent.

Paste your website, store, or docs. Get a conversational AI with video presence — no code, deployed in minutes.

The Problem

Businesses spend months and millions building AI chatbots that feel robotic, break constantly, and can't see what customers are looking at.

Meanwhile, customers expect real conversations with real expertise — not menus disguised as intelligence.

The Breakthrough

Napster Spaces converts any URL — your website, Shopify store, documentation, LinkedIn profile — into a video AI agent in minutes.

These agents don't just answer questions. They navigate your store, and guide purchases with the warmth and expertise of your best employee. Deploy them on your website, inside Shopify, on Station hardware, or across your entire digital presence.

HOW IT WORKS

STEP 1

Paste your URL

STEP 2

Customize your agent

STEP 3

Deploy everywhere

STEP 4

Measure & optimize

Our Ai Agents are ideal for...

E-commerce

Product guidance, checkout support, abandoned cart recovery

Customer Support

24/7 FAQ automation, ticket deflection, live agent handoff

Retail

In-store Station deployment, product finder, loyalty enrollment

Professional Services

Consultation booking, service explanation, client onboarding

SaaS and Tech

Documentation AI, feature walkthroughs, onboarding assistance

Media and Entertainment

Content discovery, subscription guidance, event promotion

Your best employee. On every screen.

AI agents that see, speak, and act.

PLATFORM CAPABILITIES

Zero-shot URL conversion

Point Spaces at any URL and get a working AI agent. No training data, no prompt engineering, no integration timeline. Your website IS the knowledge base.

Shopify MCP Integration

Full catalog access, cart management, and checkout guidance. Your AI agent sees every product, knows every variant, and guides customers to purchase.

Cross-channel Memory

A customer who talks to your agent on the website picks up the same conversation on Station hardware in-store. One identity, persistent context.

Embedded Anywhere

Single line of code deploys your agent on any website. Responsive, customizable, and brand-consistent across every touchpoint.

WHY IT MATTERS

Scale expertise without headcount

Deploy thousands of AI agents trained on your business. 24/7 availability in 100+ languages. No recruiting, no training, no turnover.

Video presence converts

Text chatbots get ignored. Video agents create engagement. Customers actually enjoy the interaction — and buy more as a result.

Enterprise-ready from day one

Microsoft Marketplace. MACC eligible. SOC 2 compliant. Integrates with Dynamics 365 and your existing stack. Built for procurement teams that need compliance.

Scale without limits

Deploy one agent or a thousand. Same platform, same quality. From a single store to a global brand, your AI workforce grows with you.
