## Microsoft Power Platform – Build With

Add capacity and specific skills  
to your project team in the  
most cost-effective way

Microsoft Power Platform's low-code approach to solution delivery has enabled thousands of teams around the world to use technology to transform their organisations. This is done by enabling more people than ever to participate in the app, automation, and report creation process.

While many organisations have the skills and bandwidth necessary to make good use of these new technologies and approaches, most require guidance and specialist team members to complete more complex programmes as planned. For these organisations, establishing an ongoing business relationship with Xpedition will give them access to a range of certified and experienced technology

professionals, adding specific capabilities to the project at the right time and in the most cost-effective way.

Whether you are looking to simply increase the delivery team size to shorten the programme duration, or you need to add specific skills to build a more complex solution, speak to Xpedition about our 'Build With' options for your project.

Xpedition has been helping organisations across the UK, and across the world, deliver Microsoft-based digital adoption and transformation programmes for over 20 years. Our success, and the success of our clients' programmes, is primarily attributed to deploying the right skilled and experienced technology professionals to the right projects at the right time.

By partnering with Xpedition, you and your team will have access to the right technology professionals to augment your existing programme team, as required. Whether you are looking to simply shorten delivery timelines by increasing the number of delivery professionals in a specific sprint or phase, or if you are wanting to add a specific skill or capability to your existing team to help deliver a more complex solution, speak to Xpedition about our 'Build With' options for your project.

The sooner you start the conversation with us, the better your resourcing experience will be. However, we do understand that last-minute input and guidance is sometimes needed. For some of our customers, we have been able to make senior delivery professionals available in as little as a few days, capable of stepping into an existing programme phase and adding value from day one.

## By partnering with Xpedition, you will get:

Access to the right skilled and experienced technology professionals to add to your existing team.

Be able to ramp-up and down access to our experienced technology professionals as your programme progresses without long-term punitive contractual restrictions.

Add 3rd party skilled and experienced technology professionals to your existing team, without also adding programme and project management overheads.

### Time frame

Flexible, based on your programme needs.

### Deliverables can include:

- Add specific specialist skills to deliver more complex parts of your plan.
- Add delivery capacity to your existing team to deliver more work, faster.

### Cost

From £20K

Speak to Xpedition about our 'Build With' options for your project, today.
