Microsoft Power Platform – Catalyst Digital Transformation

Embrace disruptive change as a catalyst for growth

Organisations are facing significant periods of volatility. Preparing for the disruptive changes that can impact achieving business objectives is vital to success. Businesses need to understand what digital disruption means for their organisation, and the impact it can have on their customer value proposition.

Underpinned by Microsoft Catalyst, which is built on proven concepts from Harvard Business School and McKinsey, Xpedition help organisations realise what digital transformation means to them. We do this through envisaging techniques to explore creative and meaningful ways to deliver business progress transformation.

Microsoft Catalyst is based on an IDEA framework that encapsulates proven services offerings across four key areas that, together, help your organisation build, plan, and execute comprehensive business transformation strategies using the breadth of the Microsoft Power Platform, and Microsoft Azure Cloud.

Xpedition Microsoft Catalyst certified experts will lead a series of holistic and progressive workshops that engage a diverse set of key stakeholders through proven envisioning techniques to encourage deeper business transformation conversations at levels you will not have previously explored.

Activities including Envisioning Workshops and Solution Assessments will help your organisation prepare for the disruptive changes impacting your industry. With Xpedition to guide you, you will conceive and realise real business transformation value through a series of curated phases: **Inspire, Design, Empower** and **Achieve**.

The output of these engagements is the creation of innovative, actionable plans that will revolutionise your business transformation strategy using the Microsoft Power Platform.

So what is included?

The Catalyst engagement will provide your organisation with an understanding of its end goal and actionable transformation plan, tailored to ensure your business succeeds in achieving its digital transformation goals.

Time frame – A 15-day engagement

Deliverables can include:

- Business strategy alignment workshop
- Envisioning workshop & document
- Solution assessment workshop & document
- Software demonstration
- Digital transformation plan & budget

Cost – From £15K

So what will I get?

Use design thinking to generate the desired future state of your organization. Outline how to deliver on the vision.

Define the digital transformation journey by prioritising initiatives based on business outcomes aligned with your vision. Storyboard the future vision and share with stakeholders.

Review business processes and objectives to assess which can be tackled simply with an out-of-the-box Microsoft solution, and which will require a bespoke approach.

Partner with our team to build a value-driven, phased solution roadmap that guides the steps, timeline, and processes to making your transformation a reality.

Understand how the execution of your digital journey will impact executive time, the greater team, and organizational finances with an in-depth analysis.

Inspire

Imagine what the future state of your business could look like and define your digital transformation journey

Design

Quantify the value of your business transformation, the case for change and technological impact

Empower

Ensure buy-in from your key stakeholders with our tailored solution presentation

Achieve

Execute your strategy and ensure a smooth launch with an executive ready proposal and a plan aligned to your business goals

Speak to one of our Power Platform experts to start your Catalyst journey
