

Migration Assessment

Microsoft Dynamics 365 Business Central

Want to understand if Business Central is right for your organisation? Would you like to learn how to migrate from your current system and the benefits this could provide? Let Xpedition's expertise and in depth knowledge of Business Central guide you on your journey to Microsoft's latest technology.

Over this two day free assessment we will investigate your current systems' limitations and user frustrations, as well as explore your future plans and aspirations so that we can fully understand how Business Central can optimise your business. Finally, we will provide you with a guide, mapping your path from your current system to go live and beyond, including costs and timeline.

Business Central resides within the wider Microsoft ecosystem including Office365, Exchange and PowerBI. At Xpedition, we are keen for our clients to maximise their investment in Microsoft technology and we see the unification of Microsoft applications addressing so many frequently reported business issues and providing real benefits and return on investment for organisations who embrace the change.

Agenda and outcomes

Day 1

Onsite with you and your key team members gaining an understanding of;

- The organisation – who you are and what you do
- Current systems and procedures - limitations and frustrations
- Organisation plans – short, medium and longer term
- New system requirements and wish list
- Any events driving change
- Desired infrastructure
- Project approach and timelines

Day 2

Offsite, collating findings and produce a recommendations document to include;

- Summary of current systems
- Summary of future requirements
- Xpedition's professional opinion on whether Business Central would be a good choice for your organisation. If so, evidence provided, referencing features and functionality
- Project outline – inclusions and exclusions
- Migration approach
- Example project timeline
- Licencing and professional services costs estimate
