# TRANSACT

Transaction System Enterprise

Transaction System Enterprise (TSE) makes it easy for students, faculty, and guests to access facilities, attend events, and make purchases on and off campus. Think of it as your passport to life on campus!

- Identity-based means campus-wide privileges and transactions are authorized based on who YOU are! The system attributes assigned to you are both identity-based and credential-driven.

- Credential-driven means privileges and transactions are authorized based on the system's recognition of a credential tied to your identity.

Full-feature capabilities are supported across all deployment options.

Transaction Enterprise System benefits

Hardware & partner integrations

Continue to leverage existing investments and evolve quickly with our robust hardware and application partner ecosystem. TSE is compatible with Transact and certified third-party hardware for seamless integration with your key campus system.

Proven reliability and design

Satisfying the enterprise needs of nearly 500 campuses, TSE is designed specifically for the educational community. Students and faculty enjoy the ease of use they expect, along with the security and functionality that comes with a single, student ID credential.

Technology-driven intelligence

Collect transactional and behavioral data that provides insights to optimize service delivery and operations.

Cloud deployment option

TSE cloud deployment option is Microsoft Azure-hosted and includes:

- Production system instance hosted in Microsoft Azure

- Test environment hosted in Microsoft Azure

- Service level agreement (SLA) of 99.9% or better

- Web-based reporting system, management portal and remote workstation access

- Firewall protection

- Antivirus and anti-malware

- Daily backups with 12-week backup retention

- Monthly critical operating system and security updates during scheduled maintenance period

- Application upgrades within 30 days of General Availability (GA) release during scheduled maintenance period (or custom window if not long enough)

- SOC2 compliance and oversight

- Access to the same Support team you have relied upon for application assistance

Comprehensive Managed Services

One less thing to worry about — why not focus your energy on increasing productivity? With Transact Managed Services, you can meet the needs of your students, faculty, and staff, while saving time and resources.
