

# PCI-Validated P2PE for Transact Payments Clients

TRANSACT

**Bluefin**<sup>®</sup>  
The Leader in Payment Security

In 2019, nearly 870 million records were compromised in data breaches. Each data breach has an average cost of more than \$8 million and an average of more than 280 days to identify and contain it.

So it's no surprise that credit card data breaches continue to be one of the most pressing concerns for merchants, retailers and enterprises – thanks to the astronomical cost, lost customer loyalty and brand damage a breach brings.

## The Bluefin and Transact P2PE Solution

Transact has partnered with Bluefin to provide the security and PCI scope reduction of our PCI validated Point-to-Point Encryption (P2PE) solution for colleges and universities utilizing Transact Payment's Cashiering module to process in-person payments. PCI-validated P2PE secures credit card data immediately upon swipe or dip in the payment terminal, ensuring that no clear-text data is available through the POS or network.

## What You Get with Validated P2PE

- **Reduce PCI Scope:** Merchants that implement PCI P2PE in their card present environment reduce their PCI Self Assessment Questionnaire (SAQ) to 33 questions (from 329 in an SAQ D)
- **Cost Savings:** PCI P2PE reduces PCI costs by over 70%, with savings from reduction in penetration testing, vulnerability scans, compliance assessments and more
- **Highest Level of Security:** PCI P2PE solutions have been fully vetted by a third party and adhere to rigorous key injection, chain of custody, device management, and hardware decryption standards

## Simplified Device Management

Transact customers have access to our P2PE Manager<sup>®</sup>, a 100% online system that enables merchants to monitor the complete lifecycle of each payment device while administering P2PE activities and ensuring compliance.

- ✓ **Manage:** Users, Partners, Clients, Locations
- ✓ **Devices:** Device Deployment, Activation, Termination
- ✓ **Shipments:** Track Device Shipping (chain of custody)
- ✓ **Equipment:** Deploy New Equipment, Order Inventory
- ✓ **Transactions:** Transactional, Device, User History
- ✓ **Attestations:** Create or Upload Attestations
