Tredence is an AI engineering & data science company that focuses on last-mile delivery of insights into actions by uniting its strengths in business analytics, data science and engineering.

Key ingredients of Azure Migration Solution

ROBUST DESIGN
Tredence designs the right platform architecture based on the use cases that each organization wants & needs to enable.

Pre-BUILT DATA MODELS
Tredence has designed several industry data models with key relationships & KPIs to help customers **accelerate their analytics journey.**

MIGRATION ACCELERATORS
Tredence developed custom accelerators that accelerate the migration process – including code migration, schema migration, and more.

MIGRATION PLAYBOOK
Our playbooks allow customers to speed implementation and improve quality using our approved migration methods and processes.

Business Impact

>25 %	10–30 %	~80 %
Improvement in time to insights	Reduction in support cost	Savings in platform costs in year 1
