

Smart Manufacturing @ Tredence

**Powering Last-mile Adoption of AI
for Global Enterprises**

Smart Manufacturing: Our Solutions Landscape

Predictive & prescriptive insights & integration on the edge

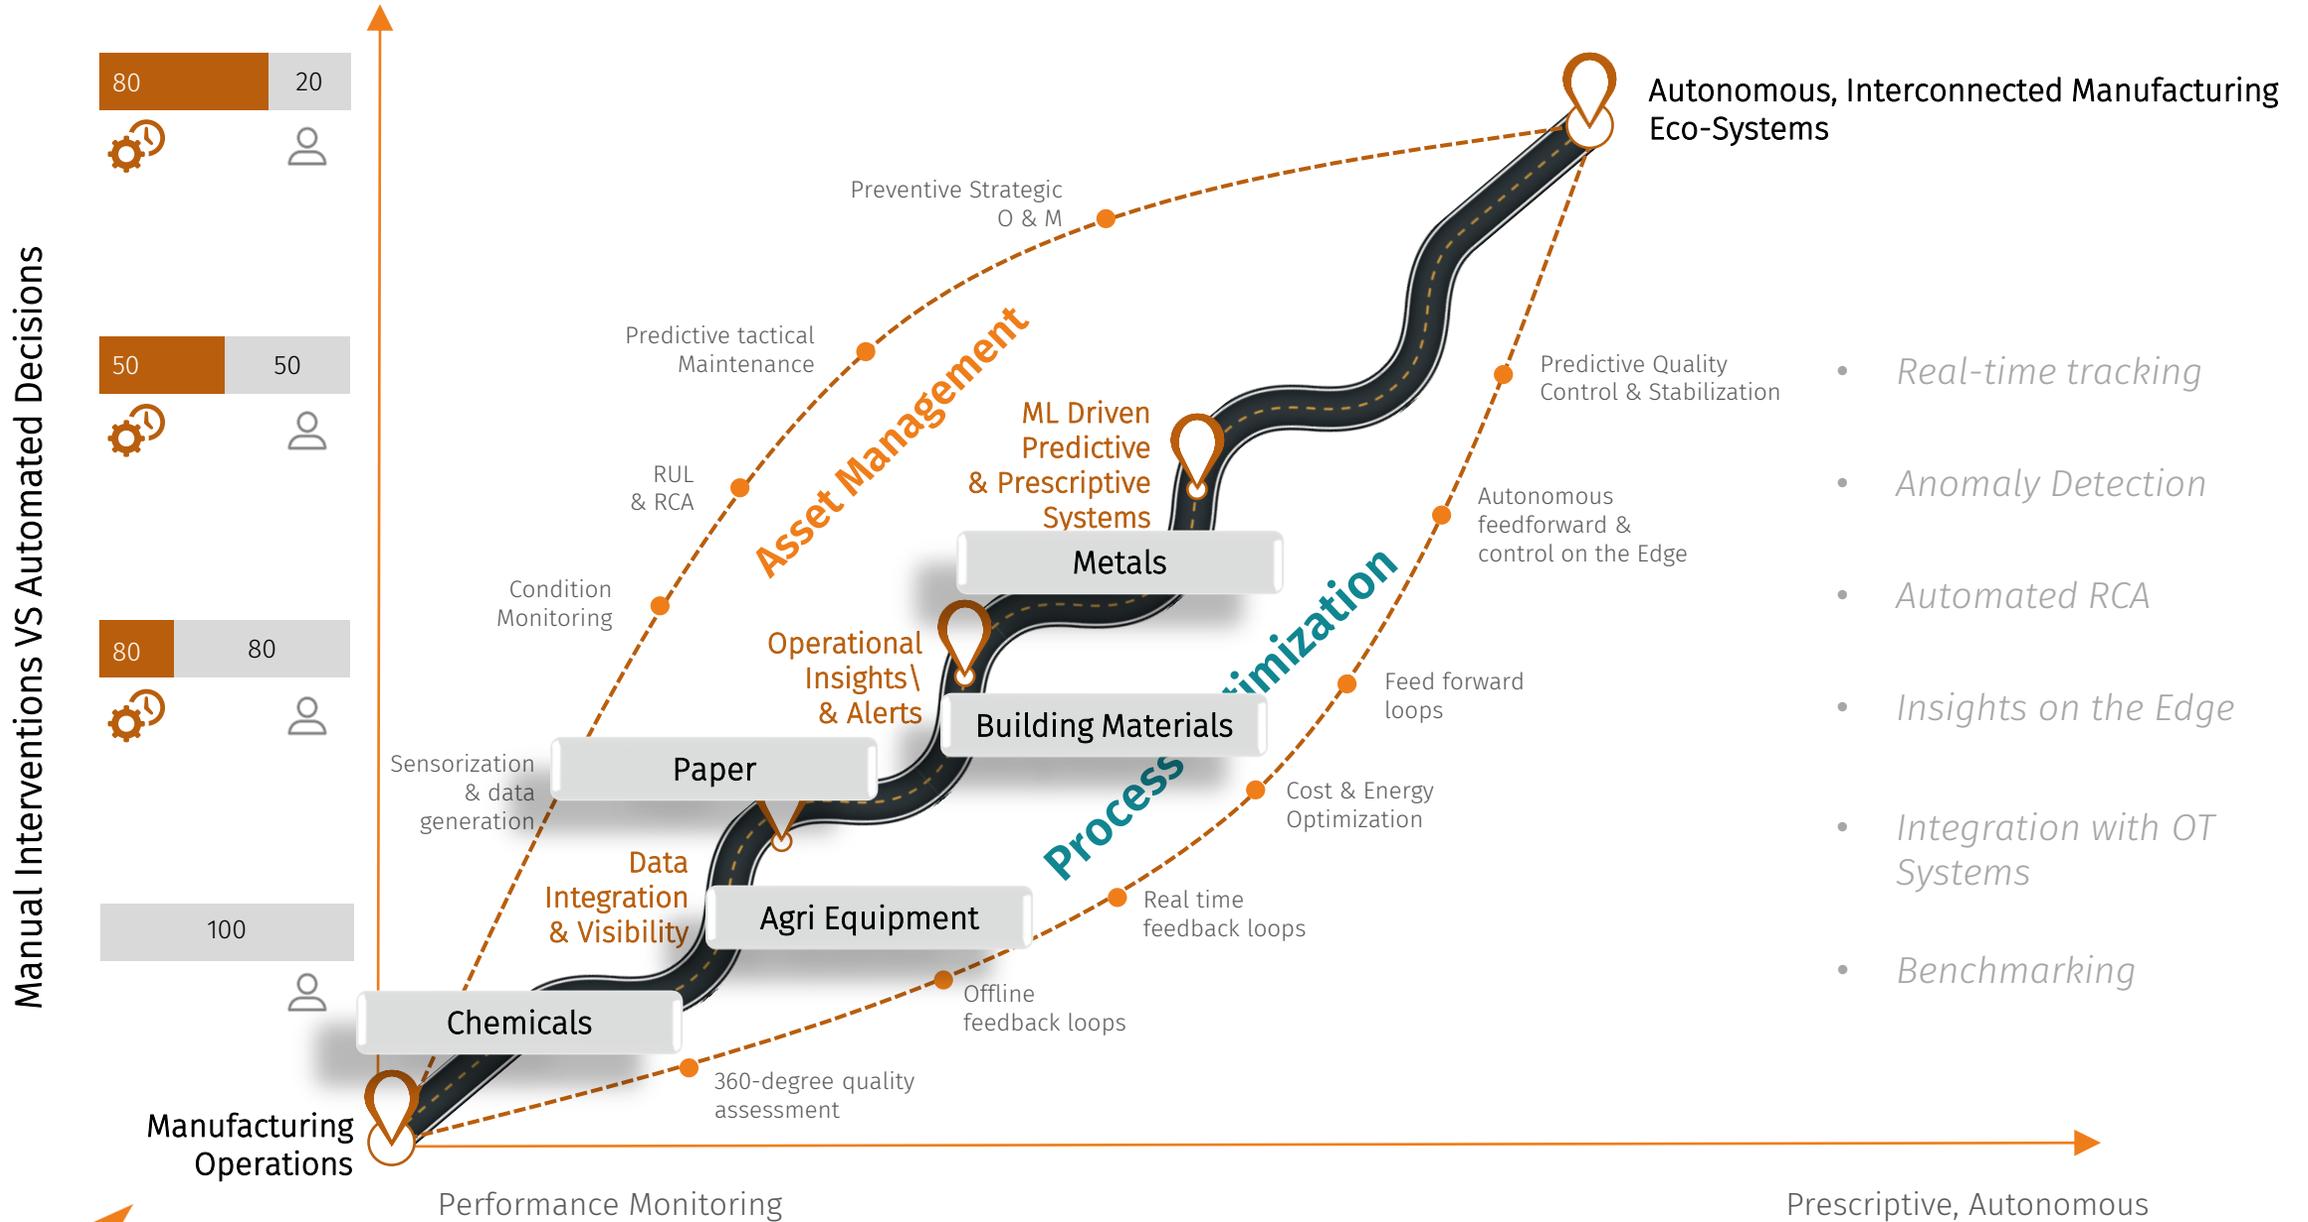

AI driven, purpose built solutions

Operational Visibility & Transparency

Enablers & architectures to bring machine & process data to the cloud

Operator	Plant M	PLC	SCADA	Historian	MES	Scheduling	Production	Packaging	Energy Consumption	Warranty
Supervisor	Line M	LIMS	Serialization	Labeling		Supply Chain	Maintenance	Traceability	Safety & Compliance (EH&S)	Recalls
QA Manager	Maint. M					Quality				

Smart Manufacturing – We work with customers at different stages of the journey

High value areas where we partner with customers

Asset Management

Condition Monitoring

Predictive Asset Maintenance

Spares Inventory Optimization

Process Improvement

Operator DSS

Energy Optimization

Scrap reduction

Safety & Compliance

Quality Optimization

Predictive Quality

Visual Defect Detection

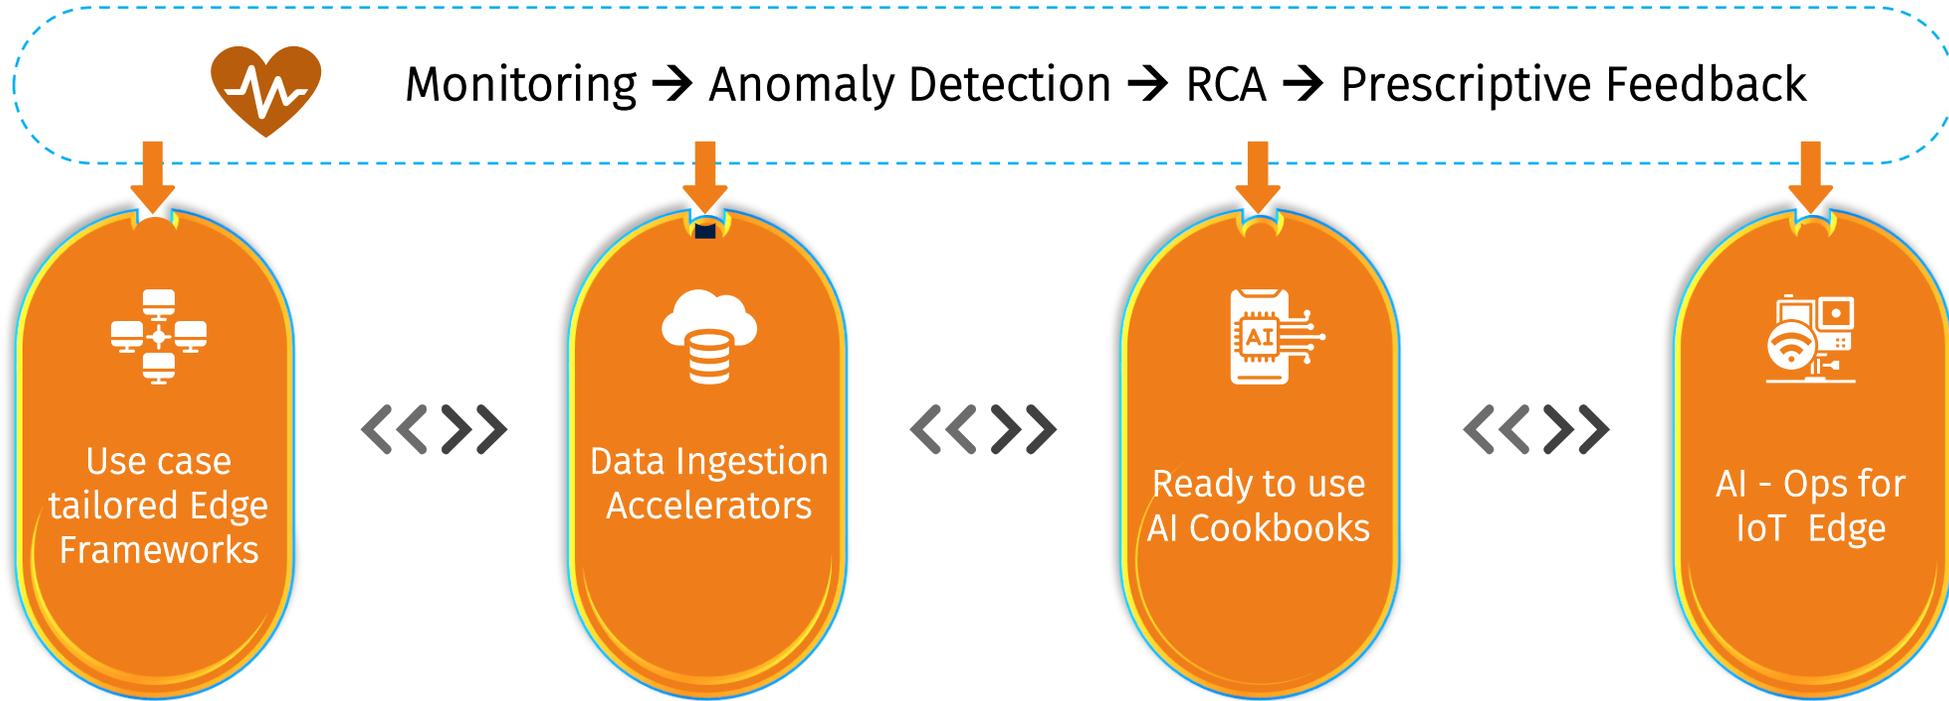

Smart Testing Frameworks

Data Curation & Governance

Monitoring & Exception Management

Edge Enablement

Tredence's ready to use building blocks in AI, data engineering & Edge thru the Industrial AI platform, help run experiments, scale & realize value faster

Industrial AI Solution Accelerator Platform

Supply Chain & Manufacturing SMEs

IIoT Solution Architects

Ecosystem partners

Smart Manufacturing: We invest in our customer's success

Staggered implementation across plants

 Scale up of proven opportunities

Efficient deployment & Ops across plants thru ML-Ops based frameworks

Tredence investment in the innovation cycle

3-4 week solution deployment & monitoring of adoption, value realization

 Impact measurement

Constants orient & train the plant teams on usage & benefits

6-8 week Pilots leading to MVP development

 PoC development with 2-3 plants

Tredence functional & Industry SME overload to build the best scope MVP

Templatized assessment of value across assets, quality, CSAT, energy footprint, TCO

 Business Value Assessment & Qualification

Tredence consulting teams discover & quantify use cases to qualify & validate

- Workshops with plant & innovation teams
- Idea generation across the value chain

 Opportunity Identification

Tredence brings in Mfg & industry SMEs to orchestrate ideation

Investment  Customer Tredence

Select Case Studies

Client	Category	Overview	Impact
1 Global Chemical Manufacturer Annual Revenue: ~\$20B	Inventory & Transportation Optimization	AI-IoT Driven smart transportation & inventory management solution	Transportation costs reduced by 5% , while avoiding hazardous inspections by field teams Predictive Replenishment
2 Global Paper Products Manufacturer Annual Revenue: ~\$20B	Quality Assurance Improvement	Computer Vision based Defect Detection before the finished product enters the packaging line	Improved defect detection rate by 34% , reducing returns & customer complaints Computer Vision
3 US Metals Major Annual Revenue: ~\$9B	Process Efficiency Improvement	Prescriptive machine parameter recommendations that help run equipment in optimal conditions	Productivity improvements by 4% , while reducing scrap & quality rejects by 24% Process Optimization
4 Leading Building Materials Manufacturer Annual Revenue: ~\$30B	Quality Optimization	Predictive Quality Control - Feedback & feedforward loops that help finetune process parameters in near real time..	Production costs reduced by 2% and GHG emissions brought down by 1.5% Quality Control & Sustainability
