Copilot Ascend

Copilot Discovery Workshop
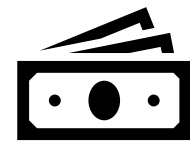

Identify transformative use cases for Copilot in this 2-hour 1:1 workshop.

Industry Scenarios for Copilot
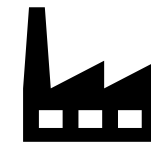

Construction: Streamline project management by automating task assignments and tracking progress in real-time.

Financial Services (FinServ): Enhance customer service through AI-driven chatbots that provide instant support and personalized financial advice.

Information Technology (IT): Automate routine IT support tasks, such as troubleshooting common issues and managing system updates.

Manufacturing: Optimize supply chain management by predicting demand and automating inventory control.

Retail: Personalize customer experiences through AI-driven product recommendations and targeted marketing campaigns.

Professional Services: Enhance productivity by automating administrative tasks such as scheduling, invoicing, and document management.

About Copilot Ascend

TrellisPoint's Copilot Ascend is a 2-hour 1:1 workshop designed to help your organization unlock the full potential of Microsoft Copilot. In this personalized session, our experts will work closely with you to identify pathways to integrate Copilot's generative AI into your operations, enhancing productivity and driving innovation.

You will discover use cases that can transform your workflows and elevate your business to new heights with the power of Microsoft Copilot. This offer is specifically designed for technology leaders aiming to innovate, enhance efficiency, and accelerate revenue generation through strategic integration of Copilot.
