

LOW CODE VISION & VALUE

CHART A COURSE TO LOW-CODE MODERNIZATION

Through this three-phased engagement, you'll gain an overview of the patterns of value, an analysis of key governance and security concepts, and next-generation AI capabilities in Power Platform.

Microsoft Power Platform helps businesses of all kinds speed up innovation with low-code development. The Low Code Vision and Value engagement is a transformative experience that will not only showcase the art of the possible but will also provide a deeper dive into the Power Platform suite, including Power Apps, Power Automate, and Microsoft Copilot Studio.

Discover the value that you can realize through:

- Application modernization - Update, rearchitect, and rebuild apps at scale and address backlogs
- Extension of LOB apps - Improve processes and experiences for core systems such as SAP, Oracle, Salesforce
- Hyperautomation - End-to-end automation with RPA, DPA, AI, chatbots, and more
- Customized copilots - Empower makers to drive productivity and modernize experiences with Microsoft Copilot

Who should attend

- IT executives (CIO/CTO/CSO)
- Digital transformation and innovation leaders
- Applications and automation technologists
- LOB leaders (HR, ops, finance)
- IT pros and decision influencers

ENGAGEMENT FRAMEWORK

ASSESS

- Gather information about your readiness for low-code
