Keep sharing.
Responsibly.

An average company of 1000 employees shares over 100,000 files externally each year, exposing itself to risks like data breaches and non-compliance penalties - a ticking security bomb!

Tricent addresses this critical need by automating file-sharing governance within Microsoft 365.

It ensures that files are not shared with external parties indefinitely, significantly reducing the risk of unauthorized access and data leakage.

With Tricent, you safeguard sensitive information, maintain regulatory compliance, and foster a secure collaborative environment.

TRY INTERACTIVE DEMO

Why Tricent?

Get a clear overview of your externally shared files >

Stop sharing with risky domains >

Stop sharing with old vendors >

Regularly remove access to externally shared files using automation >

Increase data-sharing risk awareness >
