

Fabric Fast-Track

Accelerate Your Microsoft Fabric Journey with Enterprise-Grade Governance

Transform your Microsoft Fabric implementation with Tridant's Fabric Platform Manager—a comprehensive solution that fast-tracks your analytics modernization while ensuring enterprise-grade governance and scalability.

Why Fabric Fast-Track?

- **Accelerated Time-to-Value:** Deploy production-ready Fabric environments in days, not months
- **Built-in Best Practices:** Aligned with Microsoft's Cloud Adoption Framework (CAF) and Well-Architected Framework (WAF)
- **Enterprise-Grade Governance:** Automated enforcement of security, compliance, and operational standards
- **Future-Proof Scalability:** Grow confidently with a foundation built for enterprise scale

Implementation Approach

1. **Assessment & Design:** Tailored solution design aligned with your requirements
2. **Platform Setup:** Rapid deployment of core infrastructure and governance framework
3. **Knowledge Transfer:** Comprehensive training and documentation
4. **Ongoing Support:** Optional managed services and support packages

Key Features & Benefits

Infrastructure as Code (IaC) Platform Management

- Automated deployment and management of Fabric capacities, workspaces, and security
- Intelligent capacity management with scheduled scaling and cost optimization
- Comprehensive network security configuration and monitoring
- Seamless integration with existing Azure infrastructure

Advanced Workspace Factory

- Enforced medallion architecture and best-practice patterns
- Automated deployment of standardized data pipelines, lakehouses, and warehouses
- Template-driven workspace configuration ensuring organizational consistency
- Built-in schema management and environment-aware configuration

Enterprise-Grade CI/CD Integration

- Native support for industry-standard Git workflows (GitFlow, Trunk-based)
- Automated branch policies and protection rules aligned with WAF
- Built-in approval workflows and deployment pipelines
- Integrated testing and validation frameworks
- Seamless Azure DevOps integration

Metadata-Driven Operations

- Automated data ingestion and transformation framework
- Centralized metadata management
- Extensible patterns for data operations
- Reduced administrative overhead

Comprehensive Security & Governance

- Role-Based Access Control (RBAC) at all levels (Domain/Subdomain/Workspace)
- Automated security policy enforcement
- Unified permissions management across Fabric and Git repositories
- Compliance with enterprise security standards

Simplified Management

- Intuitive web-based configuration interface
- GitOps-driven change management
- Multi-environment support out of the box
- Comprehensive documentation and operational guides

Why Choose Tridant's Fabric Fast-Track?

Experience: Deep expertise in enterprise analytics and Microsoft Fabric

Best Practices: Built-in CAF/WAF alignment and Fabric optimization

Flexibility: Customizable to your unique requirements

Support: Comprehensive documentation and expert guidance

ROI: Rapid implementation with immediate business value

Get Started

Contact Tridant today to schedule a demonstration and learn how Fabric Fast-track can accelerate your Microsoft Fabric journey while ensuring enterprise-grade governance and scalability.
