

Introducing Triomics

Our mission is to enable more efficient use of health record data for oncology care & research. Our LLM-based platform helps cancer centers make use of the information embedded in free-text patient documents.

1

Expertise in **adapting LLMs for oncology** to efficiently process large volumes of free-text cancer data

2

Mission-driven **team of 55**, including AI researchers, software engineers, trained physicians, and cancer informaticians

3

Key platform use cases include Trial enrollment, cohort analysis and quality improvement

Working with:

Tisch Cancer Center

UT Health & several others
