

TRUCE Proof-of-Concept Program

Welcome to a smarter way to stay safe and productive at work.

Keeping workers up and running at maximum efficiency is critical to your competitiveness – and that means being able to rapidly deploy mobile devices while also ensuring workers are using them productively and in compliance with company policy. How can you do all this in a scalable and cost-effective fashion? Learn more about the Proof-of-Concept Program for iOS with TRUCE™ and Stratix®.

TRUCE Software, the leading provider of contextual mobility management, and Stratix Corporation, the largest enterprise mobility specialist in the US, have partnered to offer this Proof of Concept for iOS. It is designed to provide a hands-on experience of how your organization can optimize how mobility is used across the workplace. See how TRUCE empowers you to offer the safest most productive mobile experience to your employees while protecting the company brand, assets and IP.

What Contextual Mobility Looks Like

Dynamic Intelligence

TRUCE adjusts user profiles and enforcement as needs change based on movement, proximity, and other contextual factors.

Right Apps, Right Time

TRUCE is configurable to a company's policy, allowing any apps or device functions to be temporarily enabled or suppressed when the policy requires.

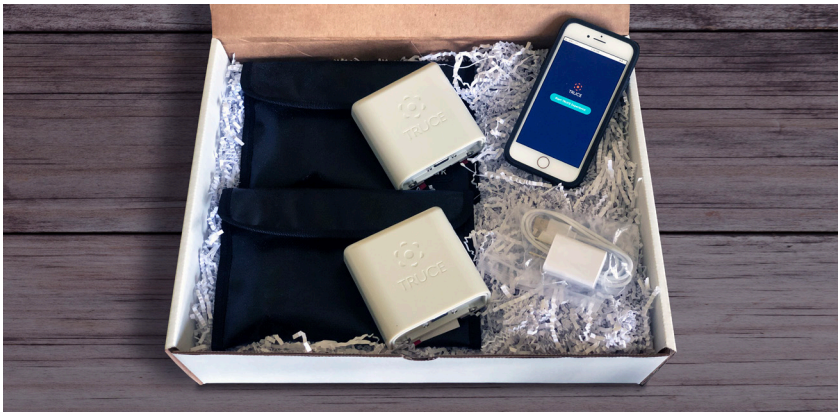

Respect for Privacy

At the heart of TRUCE's philosophy is a deep, unwavering respect for protecting the privacy of the user, their apps and data.

TRUCE Software Simulation with Stratix

TRUCE is consistently proven to drive productivity, mitigate corporate risk and safeguard employees while enabling mobile innovation. The best way to demonstrate this in action is with a no-cost Proof of Concept (POC) Simulation on iOS, for up to five (5) device participants across ten (10) days.

As a pilot participant, you will also work with Stratix to analyze your existing mobile capabilities, outline your pilot program goals, identify the apple devices and accessories that match your environment, as well as additional steps that complement the pilot to make the most of your experience.

The Proof-of-Concept Process

POC Scoping

Meet to define the scope and metrics of the POC – key ingredients for accurate results.

10-Day Solution Experience

Up to five (5) participants will experience, in real-time, what safe and productive mobile enablement looks like.

Debrief to Review Results

Review performance metrics, lessons learned, and other POC project results to decide on the next steps.

What You'll Get

Stratix-Provided iOS Devices

iOS devices from the leader in operationalizing mobile investments to deliver results.

TRUCE-Provided Software

Automated contextual intelligence for iOS, enforcing mobile use policies when and where needed.

Assigned Solutions Consultant

Expert guidance throughout the POC to ensure a successful program.

World-Class Support for Success

Specialists from TRUCE and Stratix available to maximize POC value.
