

Hybrid work and transformational end user computing experiences

Next-Gen Endpoint Workshop

Workshop highlights

 **Focus** on priorities, initiatives & key influences in your hybrid work & end-user computing strategy

 **Learn** about end-user computing strategies, Windows 11, and Windows 365 to drive endpoint modernisation to support hybrid working

 **Explore** Cloud PC provisioning & management with Windows 365 in a production environment

 **Plan** next steps on your hybrid working strategy

Modern endpoint management protects the organisation while enabling employees to work on their own terms. They can work anywhere and at any time, and do so as well as they would in the office, thus improving both satisfaction and productivity

-Forrester 2021 The Total Economic Impact™ Of Modernizing Endpoints

In our new world of work the endpoint is the new workplace, and hybrid work is driving the endpoint strategy. The shift to remote and hybrid work represents a shift in how we think about providing people with the tools they need.

Most organisations, 90 percent, anticipate seeing more usage on cloud platforms than ever before. As a result, optimising existing investments in cloud solutions remains a top priority.

Many organisations, 77 percent of those surveyed, agree on the importance of providing the latest technology to their employees, giving users the devices that they want while giving IT the capability to keep them secure.

Lastly, 80 percent of companies plan to invest in new and emerging technologies, opening the conversation on the most efficient way to deploy, manage, and secure these new endpoints.

Why you should attend

Next Gen Endpoints Workshop helps you understand the value of Microsoft's cloud solutions for end-user computing within your organisation. These solutions include Windows 365, Windows running on Azure Virtual Desktop, Microsoft Managed Desktop, Windows 11 Enterprise and Microsoft Endpoint Manager.

By attending, you can:

Understand hybrid work scenarios and end-user computing goals and objectives.

Gain insights into how your device landscape for both physical and virtual endpoints can be achieved.

Experience Windows 365 and Azure Virtual Desktop solutions that provide a secure desktop experience from virtually anywhere.

Understand Windows 365 Cloud PC provisioning and management with Microsoft Endpoint Manager.

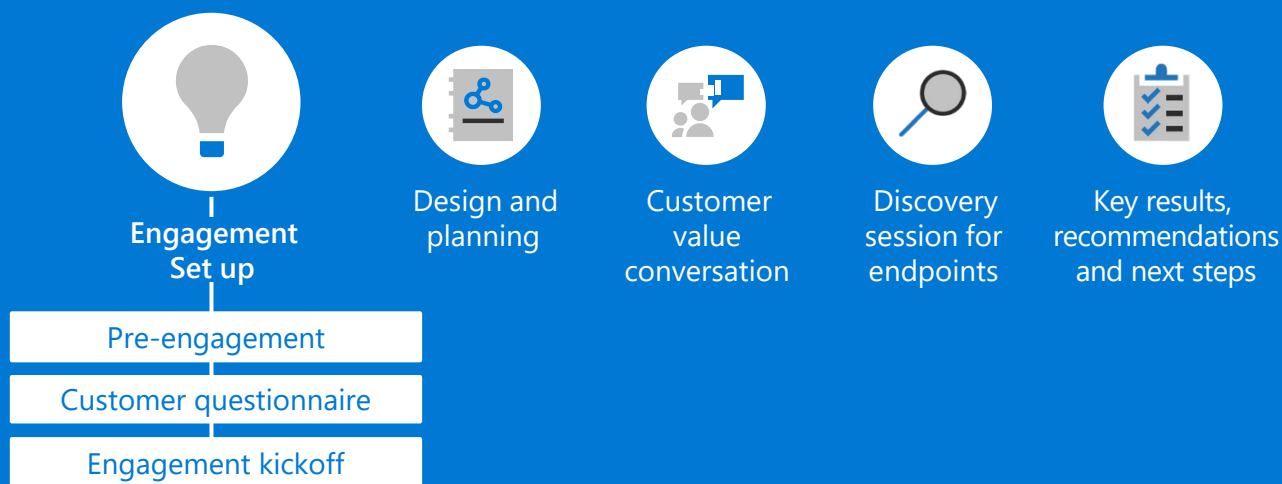

What to expect

The next generation of endpoints represents a shift in how our customers are solving end-user computing challenges. Across Information Workers, Frontline Workers, and Temporary / Elastic workforces, Microsoft customers are looking for the latest and most innovative solutions to answer those challenges.

As a specialist Microsoft Partner, we'll work with you to:

- Better understand when and how to leverage Cloud PCs with Windows 365
- How best to manage virtual endpoints across Windows 365 and Azure Virtual Desktop
- Leveraging Windows 11, the most secure OS yet, to enable hybrid work for all employees
- Implement best practices for endpoint management with Microsoft Endpoint Manager

Customise the workshop based on your organisation's needs

Who should attend

The workshop is intended for security decision-makers such as:

- IT Management
- Endpoint & Device Management owners/decision makers
- Application business owners
- IT Security
- IT Operations
- Architects

Why Trustmarque?

When it comes to Windows 365 & Azure Virtual Desktop, you need an experienced partner.

Trustmarque is a Microsoft FastTrack Ready Partner and Advanced Specialised Partner in Azure Virtual Desktop.

Contact us today to get started!
