

CLOUDGO – MIGRATION MADE EASY

We remove the complexity of migrating your datacentre

CloudGO is our Azure migration solution that gets you to the cloud faster, giving you a blueprint for your new virtual datacentre. CloudGO follows on from our Assessment Services and is designed to migrate the appropriate workloads from your on-premise datacentres to the Microsoft Azure cloud platform.

We take the outputs of your assessment and combine these with further due diligence and workshops to define a detailed scope of work, including a low level design for your cloud environment. We will also consider factors such as compliance, security, access control, and automation as well as back up and disaster recovery. We will then manage the migration of all appropriate workloads from your on-premise datacentres to Microsoft Azure.

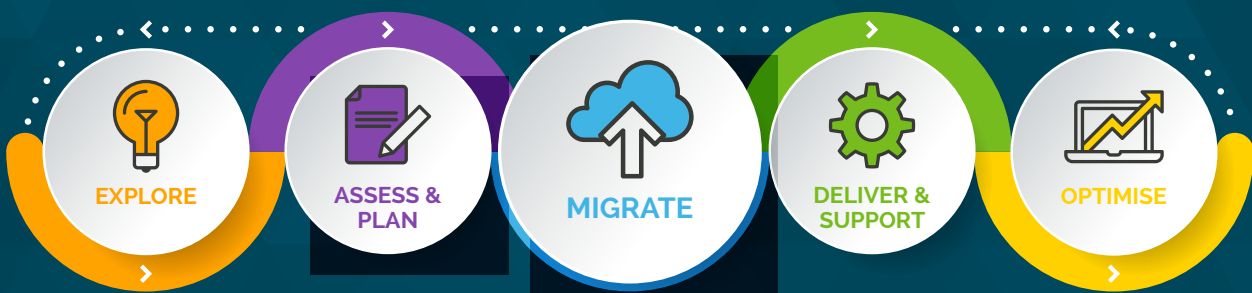

After the migration, you can either return system support back to your in-house operations team or Trustmarque can continue to support you through the Microsoft Cloud Solution Provider (CSP) programme.

Microsoft Azure Solutions by Trustmarque

When it comes to cloud adoption, choosing the correct path for your organisation can be difficult. That is why Trustmarque has developed a tried and tested approach to support your Microsoft Azure adoption and modern data centre strategy.

Our holistic and flexible approach is designed to meet the exact needs of your business to give you the right services at the right time, no matter where you are in your cloud journey.

Trustmarque Azure Solutions - Your clear path to the cloud

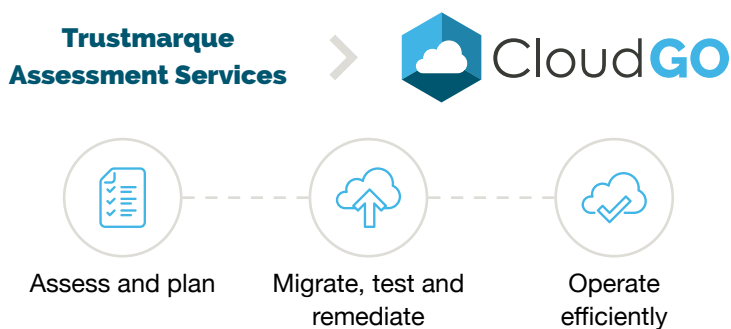

Features

CloudGo is an end-to-end solution where Trustmarque plans, designs and migrates customer workloads to the cloud. We apply technologies such as JSON templates and automation accounts to ensure high levels of automation, making your new environment easier to manage and less susceptible to human error.

We adhere to a real world, hybrid methodology and focus on moving workloads to the cloud in a way that delivers real business benefits rather than piecemeal lift-and-shift that could ultimately become costly and more problematic.

How it works

Benefits of CloudGO

- Using CloudGO as a continuation of our Assessment Services creates a holistic plan and mitigates the risks associated with a datacentre migration to the cloud
- Using tried and tested technology and methodologies, we treat each project uniquely and our migration strategies are tailored to your specific business and technical needs
- The environment will be designed with security, compliance, cost and resilience at the core
- It's a scalable solution which ensures adequate future proofing
- Automation will be built into the solution to ensure maximum productivity
- All the benefits of Microsoft Azure from a highly accredited, compliant and dedicated Microsoft partner - you're in safe hands

Why Trustmarque for Microsoft Azure solutions?

Trustmarque simplifies and removes the risk from your Microsoft Azure adoption to deliver cloud success for your organisation. Our highly accredited team has a wealth and depth of experience in successfully procuring, building, deploying and managing Azure solutions for many customers in both the public and private sectors.

With a 30-year strong relationship with Microsoft, including a wide range of gold accreditations, we are perfectly placed to help customers with their cloud workloads in Azure. Furthermore, Trustmarque's wider Cloud Services team has wide ranging and complimentary set of skills, which includes infrastructure and solution architects and BI and Analytics specialists. We draw on their expertise, skills and capability to transform our customers' journey to the cloud.
