Trustwave®

Accelerators for Microsoft Security

ACCELERATE VALUE AND SECURITY OUTCOMES FROM MICROSOFT SECURITY

Benefits

- Access a team of Trustwave consultants with deep subject matter expertise in Microsoft Security.

- Unlock the full value of Microsoft Security.

- Increase visibility, investigation, and response capabilities, responding better and faster to threats.

- Identify redundancies and opportunities for rationalization in your technology stack.

- Improve discovery and insights for enhanced metrics and reporting.

- Identify potential areas to increase return on investment in Microsoft Security.

- Attend deep-dive workshops on topics relating to Microsoft Security, reducing learning curves and optimizing deployment processes.

- Receive a roadmap to accelerate Microsoft Security capabilities and increase security maturity.

Organizations are constantly looking for ways to increase their security maturity, with a range of solutions available in the market. Microsoft Security products can provide security, compliance, and analytical capabilities to increase visibility and support investigation and response activities. However, whether you are thinking about using Microsoft Security products or have already invested, there are several factors to consider:

- Do you fully understand the capabilities that come with Microsoft Security products?
- Are you maximizing value from all your Microsoft Security investments?
- Are there redundancies in your security architecture?
- Do you know how to drive value from Microsoft Security Copilot?
- Do you have effective practices to manage your overall cost footprint?

Trustwave Accelerators for Microsoft Security provide you with a roadmap to accelerate value and security outcomes from Microsoft Security products.

Trustwave Accelerators

Trustwave reviews your Microsoft Security capabilities with the aim of increasing security maturity and identifying potential cost-saving initiatives.

Trustwave has five offerings to address your Microsoft Security needs:

1 **Accelerator for Microsoft Defender XDR:** Provides you with a roadmap to accelerate value and security outcomes from Microsoft Defender XDR. This includes assessing configurations and identifying redundancies and opportunities for rationalization in your technology stack.

2 **Accelerator for Microsoft Sentinel:** Provides you with a roadmap to accelerate value and security outcomes from Microsoft Sentinel. This includes evaluating data sources and log source types and analyzing current usage against cost model.

3 **Accelerator for Microsoft Security Copilot:** Provides you with a roadmap to accelerate value and security outcomes from Microsoft Security Copilot. This includes reviewing current operations and identifying potential use cases.

4 **Accelerator for Microsoft Purview:** Provides you with a roadmap to accelerate value and security outcomes from Microsoft Purview. This includes reviewing sensitive information types (SITs) and data sensitivity labels and evaluating strategies in place for safeguarding sensitive information.

5 **Accelerator for Microsoft Entra ID:** Provides you with a roadmap to accelerate value and security outcomes from Microsoft Entra ID. This may include assessing authentication mechanisms and analyzing device and application management capabilities.

Support Across Microsoft Security Products

Trustwave's services cover a range of Microsoft Security products to address your security needs:

- Microsoft Defender XDR:
  - › Defender for Endpoint
  - › Defender for Identity
  - › Defender for Cloud Apps
  - › Defender for Office 365
  - › Defender for Servers
  - › Defender Vulnerability Management

- Microsoft Sentinel
- Microsoft Security Copilot
- Microsoft Purview
- Microsoft Entra ID

The Approach

Trustwave works with you to assess and determine areas of improvement for your Microsoft Security capabilities:

1 **Discovery:** Trustwave works with you to gather information that describes your Microsoft Security environment. This includes conducting a kick-off meeting to discuss objectives and delivery expectations.

2 **Analysis:** Trustwave examines applicable data and information and coordinates with your stakeholders to assess your current Microsoft Security capabilities. This includes evaluating security entitlements, configurations, and/or capabilities.

3 **Reporting:** Trustwave produces a roadmap that you may utilize to accelerate Microsoft Security capabilities and increase security maturity. This includes developing a high-level roadmap for implementing recommendations and conducting deep-dive workshops.

Implementation Support: Trustwave can also help you implement changes to your Microsoft Security environment based on your needs. Implementation services may include implementing the corrective actions from the accelerator or any other activities that you are looking to implement to increase your security maturity, leveraging the full set of features and capabilities of Microsoft Security products. Implementation services are not included in the Accelerators for Microsoft Security service but may be purchased as an additional service.

Deep-Dive Workshops

The deep-dive workshops are designed to explore topics relating to the Microsoft Security area covered by the applicable accelerator (e.g., Sentinel, Security Copilot). These workshops are an opportunity for you to explore any areas you are curious about, such as specific use cases or compliance reporting enablement.

Key benefits of the deep-dive workshops:

- Choose any topic relating to the Microsoft Security area covered by the applicable accelerator.
- Take part in a 60-minute workshop with key stakeholders to discuss the subject matter.
- Get a direct, customized learning experience to address specific challenges or use cases.
- Accelerate value by shortening learning curves and optimizing deployment processes.

Microsoft Credentials & Certifications

Trustwave is endorsed and validated by Microsoft as a leading cybersecurity partner:

Certified Microsoft AI Cloud Solutions Partner:

- Microsoft Advanced Security Specializations: Cloud Security and Threat Protection
- Microsoft Intelligent Security Association (MISA) Member
- Microsoft Verified MXDR Partner
- Participation in Cybersecurity Investment (CSI) and FastTrack Ready Programs

Microsoft Certified Experts:

- Microsoft MVP 'Most Valuable Professional' (Azure Security)
- Azure Security Architect Expert (SC100)
- Azure Administrator (AZ104)
- Azure Security Engineer (AZ500)

Longstanding Microsoft Recognition

Trustwave has been recognized by Microsoft over the years:

- Microsoft 'Top Managed SOC' (1st Place)
- Microsoft Threat Indicator Top Contributor (1st Place)
- Top GitHub Contributor
