Selected companies we are working with, or have worked with, to drive business transformation

# Can I do this in ChatGPT?... No you cannot!

Product Features
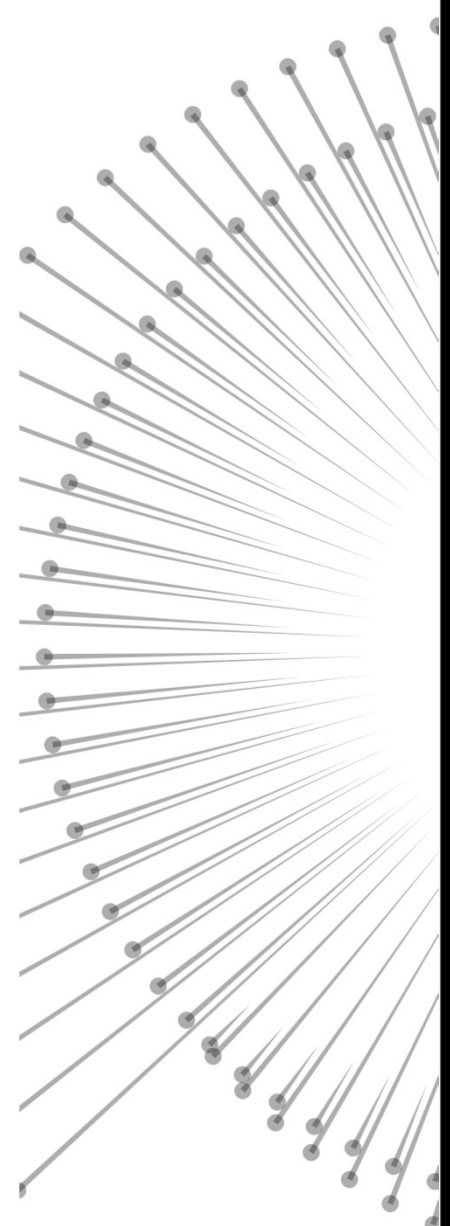

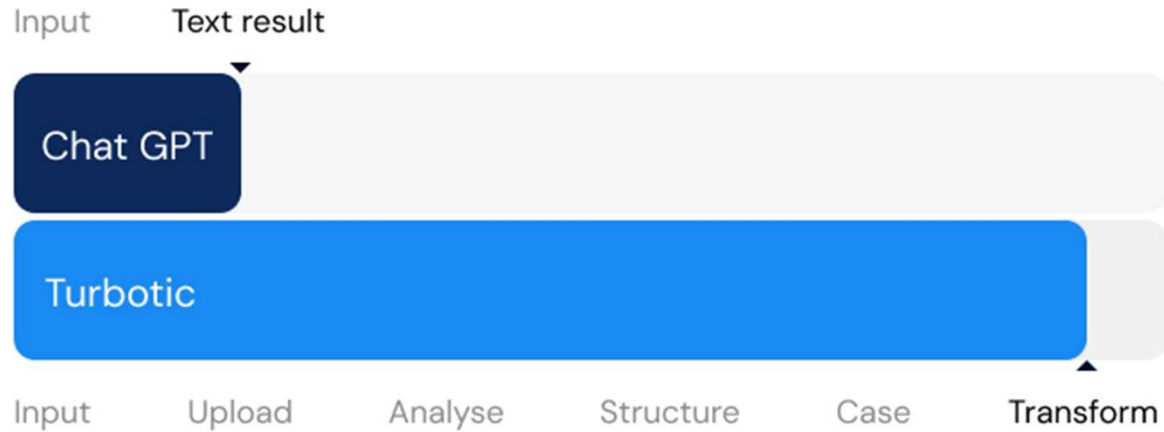

A powerful assistant with many features

With Turbotic AI you can:

- Upload data and information and get it structured, analyzed and presented in just a few minutes

- Create sharable presentations of business cases, investment analysis, sourcing evaluations and process design documents

- Use the powerful Meeting Agent to transcribe, analyze and add data to the assistant

- Create governance for each project with approval flows and invite team members for full collaboration

- Build your own business assistant for your own unique demands in structuring and evaluating data
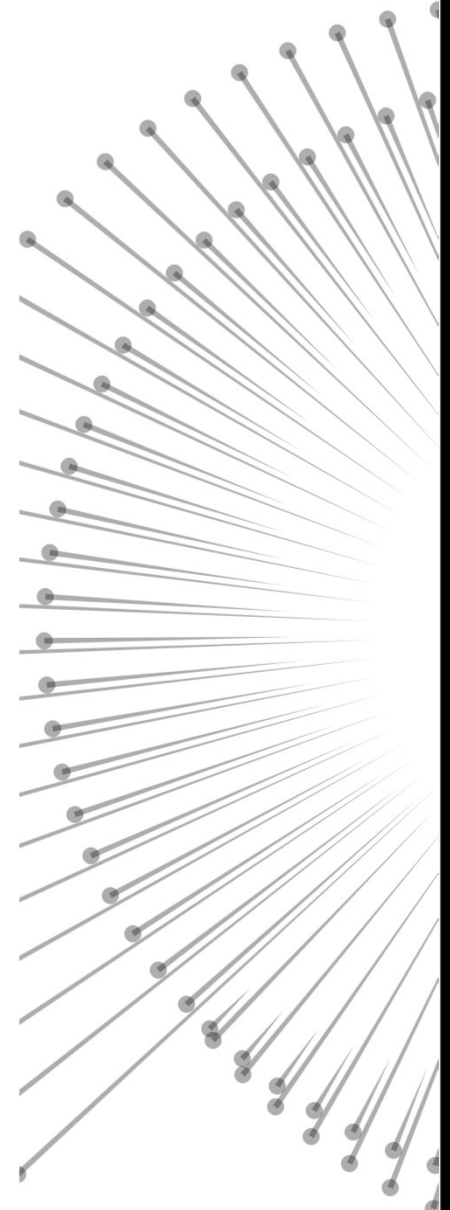

## All this for $12 per month per user
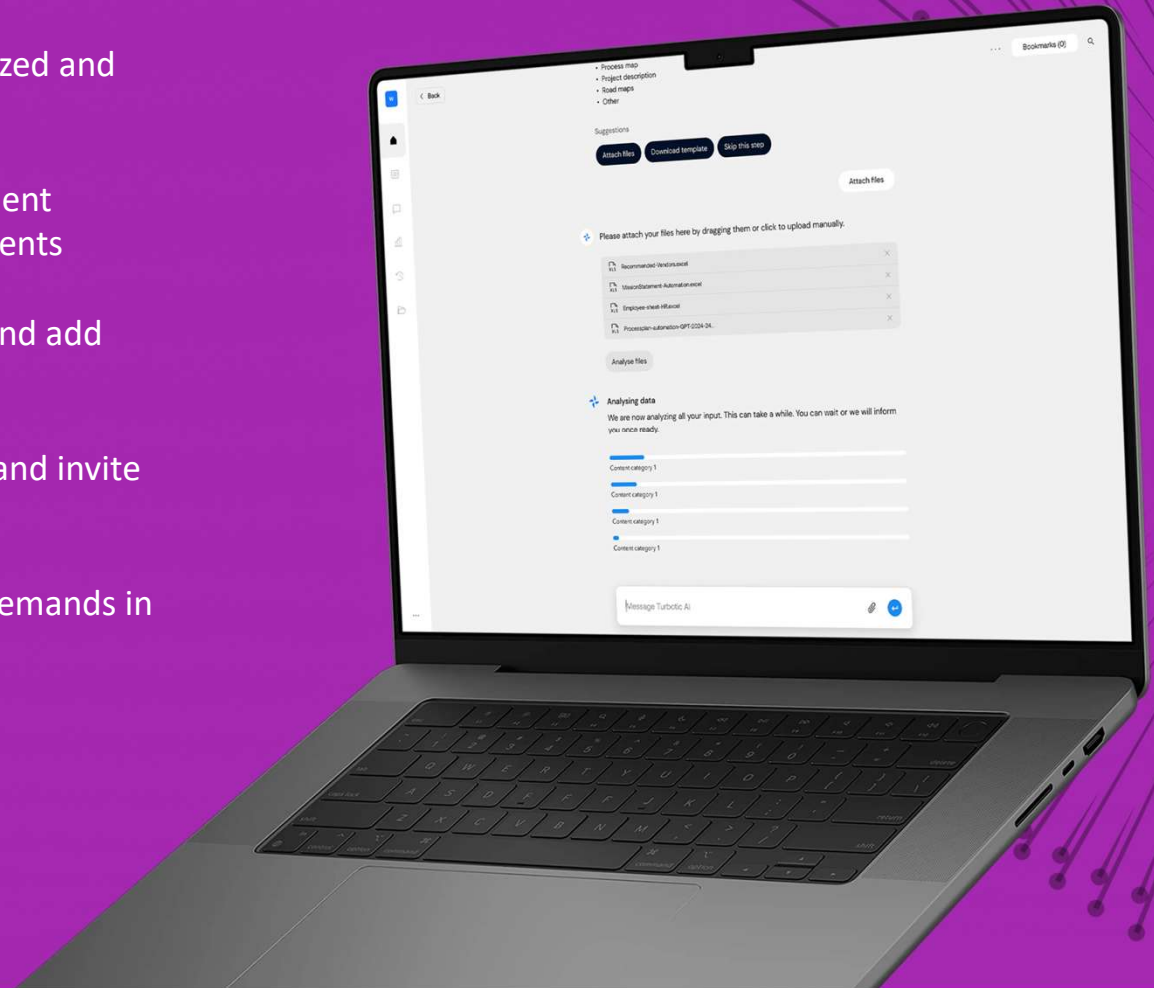

How secure is your data?

Why you can feel comfortable

- All your data is stored in Microsoft Azure with multi-layer protection and encryption

- Complete data isolation. Turbotic nor it's partners get access to your data. Turbotic does not train our models on your data, and we do not use your data in any way to improve our software

- Robust Compliance and Policy. We are ISO 27001 and SOC 2 Type 2 compliant, demonstrating our commitment to data security and privacy. We undergo regular security audits to identify and address potential vulnerabilities
