27GLOBAL

CLOUD TRANSFORMATION

Almost overnight, moving to the cloud has become an absolute necessity for ensuring a company's business continuity and long-term existence. To avoid unnecessary challenges, organizations need an experienced cloud partner to deliver a tailored and optimal solution.
Let's get your head in the clouds.

We recognized early the benefit of using cloud technologies to decrease time to market and reduce development costs. By leveraging the cloud, we can focus on your unique business challenges while mitigating costs. Whether retiring an older platform or moving workloads into the cloud, 27Global will outline the steps needed to make the transformation as seamless as possible.

How do we help? 27Global will:

- Analyze applications and infrastructure to define your optimal cloud solution (public, private, multi-cloud or hybrid)

- Develop a strategic migration road map

- Focus on re-platforming and re-architecting instead of simply re-hosting

- Retire antiquated platforms

- Update migrated apps to take advantage of cloud capabilities and economics

- Continue to monitor your infrastructure to optimize resources

CLOUD TRANSFORMATION

27Global's Cloud-Native Software Solutions

27Global's proven track record of delivering Cloud-Native software solutions, combined with our Cloud and DevOps expertise, will guide and execute your move to the cloud.

We'll analyze your applications and infrastructure to define the best customized cloud solution for your business, and then develop a road map for getting there.

Help your company scale, stay competitive, innovate and save money all at the same time.

By partnering with the leading providers of public, private, and hybrid cloud solutions, 27Global can focus on clients' unique business challenges, instead of spending time re-architecting the wheel:
