

## Company Overview

---

TWE Solutions is a security-first IT Infrastructure consulting company headquartered in Marina Del Rey, California. TWE specializes in information security, multi-OS on-premise and cloud systems, and network design. Our focus is the highest level of client service and communication as the foundation for highly technical design, implementation, and consulting services.

TWE Solutions brings a team of experienced system, network, and security engineers to complete diverse and sometimes complex projects and consulting engagements. Our goal is to build long term partnerships with our clients by delivering high value expertise, implementation, and communication in critical areas of the enterprise infrastructure.

Our clients include some of the largest and most well known organizations, and focuses intently on helping customers achieve high levels of security tailored to their specific requirements. TWE's success comes from working collaboratively with our clients to realize a vision for the infrastructure that marries security with productivity.

We are committed to delivering a highly proactive experience with consistent, clear communication, expectation setting, and insight into new methods and technologies that offer further strategic improvements for our clients.
