What does your business get by increasing operational effectiveness?

TWISTEDFISH

Reliably control spend	Improve workload operational excellence	Increase productivity of hybrid and on-prem workloads
45%		206%
Of organizations that lift-and-shift to the cloud without cost optimization will overspend by 70% in first 18-months[1]	Automated recommendations and architecture as code help IT staff prioritize what matters most	Potential 3-year ROI and reduced spend on 3rd party tools used to manage multi-cloud & hybrid environments[2]

We achieved a 15 to 20 percent benefit on the annual spend as a result of housekeeping. No one realized that the fruit of that was that big."

Kristina Moln-Page
Head of Finance at ASOS
