Running ANSYS in the Cloud

UberCloud's ANSYS Cloud Service enables companies of all sizes to quickly adopt a world-class high performance cloud computing solution for ANSYS

Key Features of UberCloud

- ✓ Tier0 HPE and Microsoft partner and the only ANSYS partner on the Azure Marketplace

- ✓ ANSYS software pre-installed and configured for cloud with latest CPUs and GPUs

- ✓ GUI features of ANSYS including Workbench for true interactive analysis

- ✓ Proven approach to ensure ANSYS cloud success. Dozens of joint case studies and proof points

Key Benefits of UberCloud

- ✓ Design products faster by running ANSYS on powerful remote infrastructure

- ✓ Expand and shrink your hardware on demand to meet your needs

- ✓ Retain full control with an interactive cloud desktop, with ANSYS preinstalled

- ✓ Total peace of mind with expert worldwide support

- ✓ Lower total cost of ownership by only using the cloud resources you need

- ✓ Collaborate across geographies in the cloud

- ✓ Eliminate IT support headaches

- ✓ Lower the risk of your cloud-adoption journey

Why Cloud?

- ✓ Enables customers to innovate and reduce time spent on low value IT activities.

- ✓ Increases customers' utilization of advanced parallel processing and design optimization tools.

- ✓ Lets customers lower internal IT hardware requirements & reduce cost of ownership.

- ✓ Automatic patching/updating of ANSYS gives customers earlier access to new ANSYS features.

UberCloud Advantage

Faster Time to Value
UberCloud will work closely with you at every step of the cloud journey. We do sizing, demos, proof of concepts, and more. We compress implementation cycles and show cloud value in a very short time.

Lower Total Cost of Ownership
UberCloud's software + expertise model results in a much lower Total Cost of Ownership than other methods such as owning and managing an in-house cluster or hiring HPC experts for developing in-house.

Lower Risk
UberCloud's award winning ANSYS software container technology has been validated by ANSYS, HPE, Intel, and Microsoft. They deliver ultimate predictability and many more unique benefits to you.

Faster Support
UberCloud has a global team with strong CFD, FEA, EMA & HPC expertise, and laser-focus on CAE customers. This means your issues are solved quickly, and any custom requirements are delivered faster.
