Azure

Product Overview

Power BI Embedded Application designed to help organizations manage all their Power BI reports efficiently. It enables seamless integration of Power BI content into custom applications, offering centralized access and control.

Key Features

- ☐ Embed Power BI reports and dashboards into web applications –
- ☐ Centralized report management
- ☐ Role-based access control
- ☐ Automated data refresh

Benefits

- ❑ Improved accessibility and user experience
- ❑ Enhanced security and governance
- ❑ Reduced licensing costs with app owns data model
- ❑ Streamlined report deployment and updates

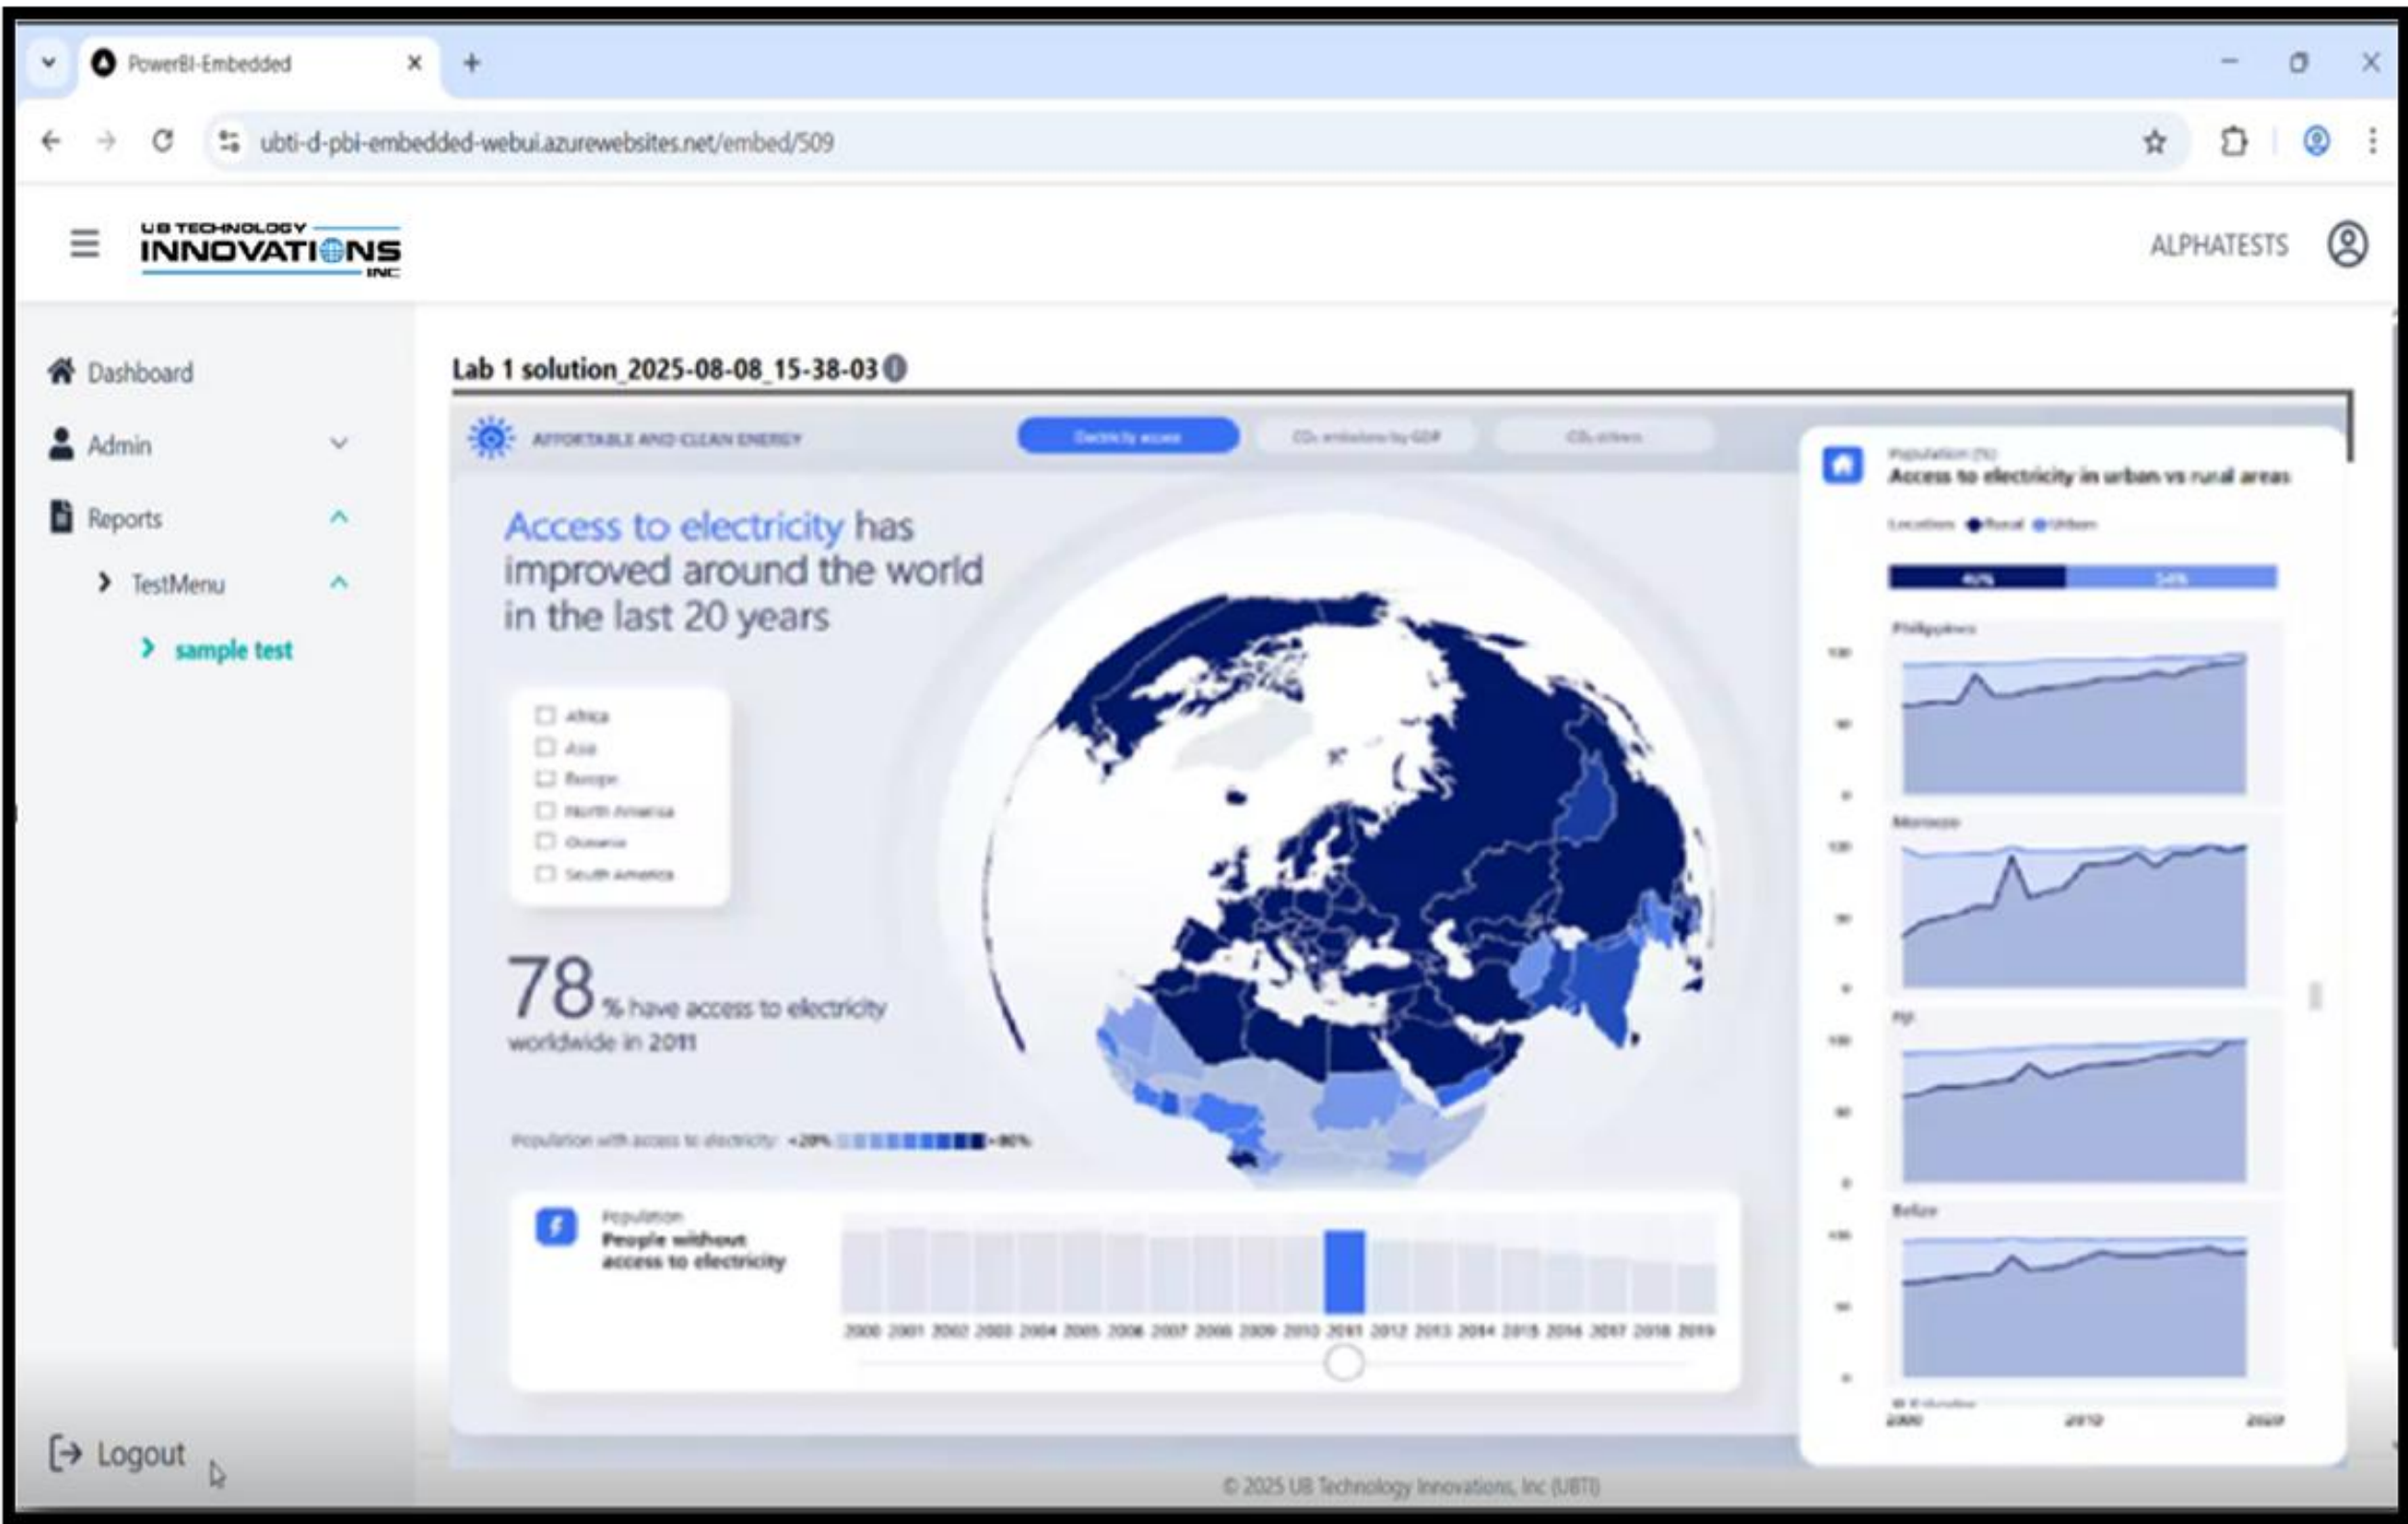

Architecture Overview

The application uses Power BI Embedded analytics via Azure. It requires registration of a Microsoft Entra app for authentication and access to Power BI REST APIs. Reports are hosted in Power BI workspaces and embedded using secure tokens.

Getting Started

- 1) Go to UBTI's Power BI Embedded Solution in Microsoft AppSource Gallery
- 2) Register a new user in UBTI's Power BI Embedded Application
- 3) Create a new user and a new security group in your Microsoft tenant
- 4) Register a new app in Azure
- 5) Add the new user and new security group to the registered app
- 6) Give Power BI API Permissions
- 7) Add the security group to all the Power BI workspaces as member which are to be shared in the application for your costumers or members within your organization
- 8) Login into UBTI's Power BI Embedded Application
- 9) Create required menus and assign the reports
- 10) Assign the reports to required members with required Access
