

PowerPulse Overview

1. Product Overview

PowerPulse is an intelligent governance platform purpose-built for Power BI, offering visibility, automation, security, and compliance in one centralized solution. It empowers organizations to efficiently manage workspaces, users, reports, datasets, permissions, and usage analytics—simplifying oversight and reducing risk.

Key Features

- Automated Power BI Governance – Comprehensive monitoring of workspaces, reports, and datasets.
- Security & Compliance Controls – Detect unauthorized access and track external sharing risks.
- Scheduled Data Processing – Nightly updates ensure governance data stays current.
- Azure AD Integration – Supports SSO, MFA, and role-based access control (RBAC).

2. How PowerPulse Works

PowerPulse connects directly to your Power BI environment using secure Azure authentication. It leverages the Power BI Admin APIs to gather governance data and deliver actionable insights through a centralized dashboard—no agent installation required.

Workflow Overview

1. Connect – Authenticate with Azure AD to securely link your Power BI environment.
2. Collect – Retrieve security, compliance, and usage data from Power Platform.
3. Deliver – Generate automated reports, alerts, and governance insights.

PowerPulse is entirely API-driven, ensuring fast, frictionless setup and ongoing scalability.

3. Deployment Model

PowerPulse is a cloud-native SaaS solution hosted on Microsoft Azure, designed for rapid deployment and scalability.

Cloud Deployment (SaaS Only)

- Hosted on Azure with a secure, multi-tenant architecture
- Self-service onboarding via Azure Marketplace
- No agents or infrastructure setup required
- Automatic updates and security patching
- Scales effortlessly to support growing Power BI environments

PowerPulse ensures a low-maintenance experience while meeting enterprise-grade governance standards.

4. Pricing & Subscription Plans

PowerPulse is available through a simple, transparent subscription model designed to meet the needs of teams at any stage of their Power BI governance journey.

Free Trial Plan

Ideal for first-time users exploring PowerPulse capabilities.

- \$0 for 30 days
- Unlimited reports
- Daily governance data refresh
- Hosted in US Data Center
- Automatic expiration after 30 days unless upgraded

Explore Plan

- \$99/month
- Up to 240 reports included
- Daily data refresh & automated insights
- Email support included
- Hosted in US Data Center
- Additional reports: \$0.24/report/month

Upgrade at any time directly through the Azure Marketplace.

5. Target Customers

PowerPulse is designed for IT administrators, security teams, and data governance leaders who need clear oversight and control across their Power BI environments.

Who PowerPulse Is For:

- Enterprise IT Teams – Managing multiple Power BI workspaces, users, and permissions at scale
- Security & Compliance Officers – Monitoring access, sharing policies, and regulatory adherence
- Microsoft Cloud Solution Providers (CSPs) – Supporting clients with centralized Power BI governance
- Mid-Sized Organizations & MSPs – Seeking a cost-effective, low-maintenance governance solution

Whether you're securing internal data or managing analytics for multiple tenants, PowerPulse simplifies and strengthens your Power BI oversight.

6. Compliance & Security Measures

PowerPulse is designed with enterprise-grade security and governance in mind.

- Azure AD Integration – Supports SSO, MFA, and role-based access
- Secure API Access – Uses OAuth 2.0 authentication
- Encrypted Data – All data is encrypted in transit and at rest
- Activity Tracking – Monitors permission changes, access, and external sharing
- No Local Installations – 100% API-based for secure, agentless setup

PowerPulse helps your team meet key compliance needs while maintaining full visibility and control.
