Visitor Registration Management (VRM)

Efficient handling of visitor for congestion free entry & exit along with flexible vehicle handling

VRM provides better ways to handle visitors of various categories from interns to vendors. It tracks the entry/exit of individuals along with their vehicles and gives an organized periodic report on visitors.

VRM has four major modules which have distinct dependency to give us a track on the individual visitor's entry/exit. The modules are visitor entry, vehicle register, visitor tracking and exit. The app has a nature of simple user-friendly interface for flexible operation for any security personnel. All the records can be viewed as a report or even exported as a PDF file for flexible internal operations. Security personnel leverage the apps ability to ease parallel processing like registration, tracking, monitoring and having control over entry and exits.

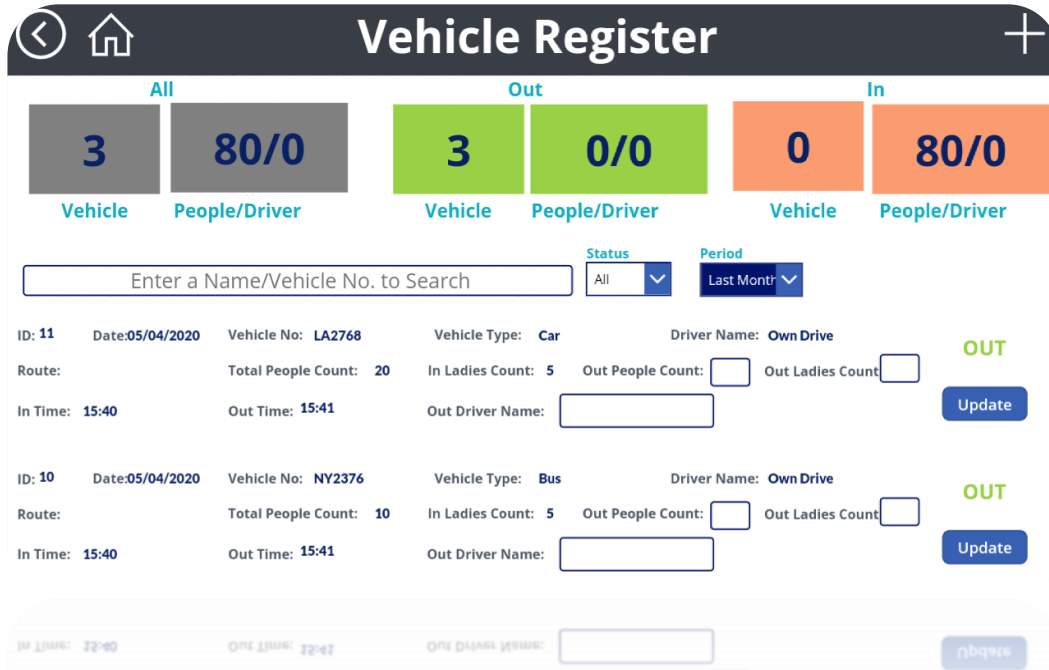

Vehicles entry and exit provides insight to the logistics and admin team in optimizing vehicle handling in loading, offloading and allocating appropriate parking spaces.

PowerApps

Empowering everyone to build apps

VRM records IT assets, vehicles and supply materials of visitors, restricting the unauthorized leakage of organizational assets.

Features & Benefits:

- ❖ **User friendly** interface in managing visitors
- ❖ **Smart entry** with auto fill feature for visitor entries
- ❖ **Near Real time** recordings of In-time and Out-time of the visitors during entry and exit
- ❖ **Analysis** on the check-in and check-out people count for favorable assistance
- ❖ **Effective Parking allocations** with control on entry and exit of vehicles
- ❖ **Hassle-free** registration process
- ❖ **Reduces** the risk of data loss
- ❖ **Optimizes** company security and management operations
- ❖ **Informative and interactive** insight on Visitor's Status
- ❖ **Multi-device compatibility** enabling users to access from any device or platform
- ❖ **Flexible** data handling to export reports
