Augment WMS with Realtime Rate Shopping

Business Case

Augment WMS solution by identify the individual carrier rates for each loads using the APIs and determine the best carrier through comparison, share the final Ship-Via back to WMS. Ability to print labels as per the winning carrier label templates

Ecosystem

Oracle Fusion SCM Cloud |
Oracle Fusion Cloud Manufacturing |
Oracle Warehouse management | FedEx

Solution Provided

Automate Carrier APIs to learn the rates by feeding shipment size, origin and destination pairs and identify the best carrier for the existing shipment. Based on the wining carrier, publish the Ship-Via to Oracle WMS application.

Metrics

100% optimal carriers for each load

Outcomes

- Seamless data integration from Oracle ecosystem to UCBOS for rate shopping
- Real time business decisions based on API responses
- Maintain previously procured carrier rates for comparisons
- Print related labels for dispatch and shipping
- Orchestrate the final winning carrier to Oracle ecosystem
