

# Design tailored data products across industries and departments

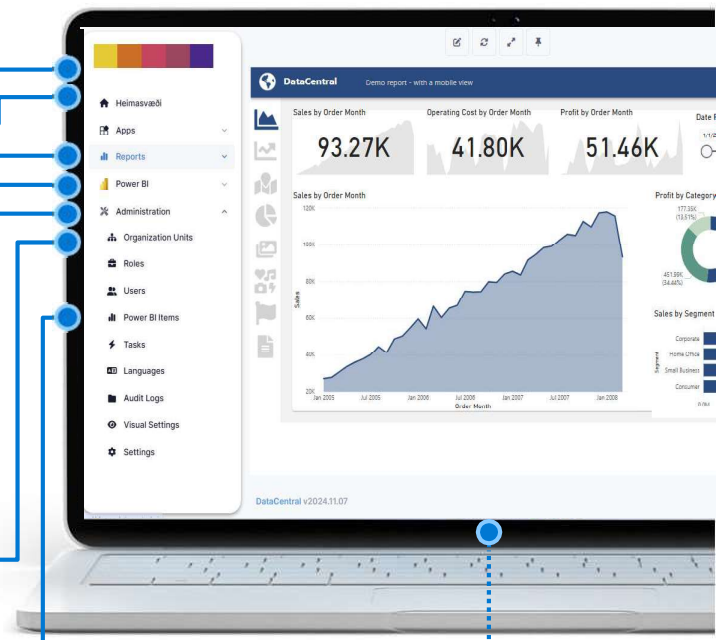

- ✓ Get started within minutes
- ✓ Extends & enhances existing BI investments
- ✓ Secure, trusted platform

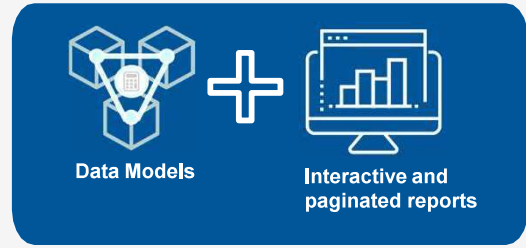

## Competitive edge

- Complementary to Existing Tools:** Enhances BI tools instead of competing with them.
- Future-Proof Design:** Supports AI advancements and seamless platform integrations.
- Cost Savings:** Simplified and streamlined licensing and reduced operational overhead.
- Modules:** Upsell opportunities with practical extension that are lacking in modern BI tools.
- Customer Empowerment:** Delegated access management simplifies operations for end-users.
- Embracing the API-Economy:** A turn-key delivery platform for ISVs and custom applications
- Secure and govern** with a unified admin centre and data and access controls.

- Extend with your preferred AI provider
- Connect to any endpoint with a low-code/no-code approach
- Direct access to data models
- Extends beyond Data visualization
