Your Processes

Your Applications

Systems of record – ERP, CRM, HCM | Communications and Collaboration | Personal Productivity

Your People

Gain complete transparency into your business processes and transform them with automation and improvements that drive continuous operational efficiency

Leverage the digital footprints in systems and applications to paint an accurate and complete picture of every process

Zero in on bottlenecks, deviations and inefficient processes that should be redesigned or automated

Boost the success rate of your automation and transformation initiatives

Continuously measure the impact of process improvement and automation—KPI by KPI

“We've delivered eight process mining projects so far, and the results from those are **phenomenal**.

We've built a backlog of opportunities for automation as well as identified areas where the **process can be improved before even getting into automation.**”

Sumit Shrestha
RPA Service Desk Owner

Get an objective, data-driven picture of tasks employees perform on their computer—quicker and with fewer resources required

Get an objective data-driven picture of as-is processes, quicker and with fewer resources involved

Give employees the power to guide the tool to gain even deeper insights about end-to-end tasks

Gain visibility into your tasks and get a way to act upon gained insights through automation and process improvement

Centrally govern your discovery projects and keep data secure and private

UiPath Task Mining helped us overcome the first stumbling blocks of having subject matter experts be able to explain what they do in 'bot-eez'. As we continue to automate more complex finance processes, Task Mining will become even more **critical in defining the as-is**, which will **accelerate our automation program**.

Bob Hartman
Chief Account Officer, Stoneridge

Mine, monitor, and automate every conversation to enhance efficiency, productivity, and customer experiences

Identify process inefficiencies and transformation opportunities hidden in communication channels

Understand what your customers really want and what's holding your business back

Track and continuously improve the service you provide to customers and employees

Scale automation and AI to new business areas—quickly and cost-effectively

Communications Mining has completely changed the way we see service.

It used to take three weekdays for a broker to receive a response from our team. Now it takes less than three hours. Our brokers understand demand and value-add in a completely different way now.

Marco Rodrigues

Head of Service Center, Efficiency and Automation, Hiscox

Centrally capture and manage all process improvements and automation opportunities, prioritized by impact and ROI

Track everything from idea to production in one place—with visibility and control

Invest in opportunities that matter to your business by prioritizing them based on your KPIs to maximize impact

Accelerate improvement and automation with efficient collaboration across SMEs, developers, and the CoE

Track meaningful metrics and visualize the performance of your automation program to easily report to your stakeholders

When you take the automation program to the leadership, numbers come into play!

When I can quickly click on a **cost-benefit analysis** and say: **this is your savings**, and this is how much we'd need to invest—it is a win-win because it's so simple to show.

Luke Thompson
Project Manager, Risk Customer Ops

The Business Automation Platform

Discover

Automate

Get more done with a digital workforce that seamlessly collaborates with your people and automates work via UI and API, powered with native integrated AI

LOW-CODE DEVELOPMENT

Build business apps and automations rapidly with low-code, visual tools

UI/API AUTOMATION

Combine UI/API automation for maximum flexibility, scale, and speed across the broadest range of systems

PROCESS ORCHESTRATION

Create smarter decision-making and collaboration between people and robots

INTELLIGENT DOCUMENT PROCESSING

Remove the work from paperwork with semantic understanding of a wide range of documents—accurately and quickly

INTEGRATED NLP & AI/ML

Make your robots smarter with NLP and AI/ML models to automate more sophisticated work

Operate

Your Processes

Your Applications

Systems of record – ERP, CRM, HCM | Communications and Collaboration | Personal Productivity

Your People

Build business apps and automations rapidly with low-code, visual tools

From everyday users to advanced developers—everyone can build apps and automations

You get the fastest time to value thanks to hundreds of ready-made components and templates

Even the AI skills like document understanding are drag-and-drop

Trigger automations from within your everyday apps

Even on a complex use case, if we have commitment from the business and process owners to truly document the requirements, **the actual development literally takes just a few weeks.**

Oleg Royz
VP of Global Automation and Head of CoE

Combine UI and API automation for maximum scale and speed across the broadest range of systems

Automate across both legacy and modern technologies—all within a single workflow

Speed up time-to-value with pre-built automation components, including popular API-based connectors, activities and event triggers

Build and run your UI + API automations anywhere you'd like, across Windows, MacOS, or Linux

UiPath is the **most flexible tool**. It can interact via UI to our Sales and Marketing systems, to Workday, to ServiceNow. It cuts **across every function that we have in the company.**"

Derrick Miu
Director, Data Management & Strategy

[LOW-CODE DEVELOPMENT](#)

[UI & API AUTOMATION](#)

[PROCESS ORCHESTRATION](#)

[INTELLIGENT DOCUMENT PROCESSING](#)

[INTEGRATED NLP & AI/ML](#)

Orchestrate business processes end-to-end across the enterprise

Avoid process fragmentation and scale your automations across different business units

Easily automate long-running-workflows by bringing humans in the loop to handle business exceptions

Manage, monitor, test, and secure your entire digital workforce from a single place—even remotely

Leverage integrations for external BPM, analytics, and other custom tools—all with a single platform

Immature and fragmented processes have been cited in our past three surveys as the most significant barrier to delivering intelligent automation at scale.

Process fragmentation happens when business-critical processes are not managed in a unified workflow. They become a series of handoffs among departments, teams and systems, introducing a risk of error and delay with each handoff.

Deloitte
Automation with Intelligence Report, 2021

Remove work from paperwork with software robots that can read any document, pull any info, and pass it anywhere it needs to go—accurately and reliably

And we mean ANY document: PDFs, images, skewed or low-res scans, invoices, emails...

AI-powered robots understand your custom document types and help apply your own business rules

Bring people in the loop to validate results, so robots can learn and improve over time

End-to-end intelligent document processing—from process discovery to execution to analytics

The solution has delivered a **70% reduction in the time it takes to process invoices**, with about 53% of all invoices being handled without any human involvement. This helped our P2P finance team dramatically reduce the workload of eight full-time employees who were managing about 824,000 invoices annually.

Luis Cajiao
Senior Manager, Smart Automation Global Business Services, Thermo Fisher Scientific

ThermoFisher
SCIENTIFIC

Automate more with AI built into every part of your business automation platform

Computer Vision is woven throughout the platform to enhance the ability to understand and automate diverse and dynamic interfaces

Process documents and automate communications with expert-level precision by using pre-trained models

An open approach allows you to use out-of-the-box AI skills, AI capabilities from ecosystem partners, or bring/build your own

Easily drag-and-drop AI directly into your workflows

RPA and AI work in close collaboration—in tandem. They work together for us to help **solve a lot of complex tasks that we can't solve with RPA alone.**

So, we started looking at complex use cases where you have a component of automation, but at the same time you do need to infuse it with AI capabilities.

Akbar Thobani
CTO Director, Intelligent Automation and AI

Your Processes

Your Applications

Systems of record – ERP, CRM, HCM | Communications and Collaboration | Personal Productivity

Your People

Get the operational insight *and* the business insight you need for your automation program

Track, measure, and analyze the performance of your entire automation operation

Quantify the money and time saved (ROI) by your automations

Align automation goals to your business goals—one KPI at a time

Easily share reports with key stakeholders and process owners

The ROI dashboard is amazing. It's very easy to calculate not just the hours saved but the other positive impacts we deliver that benefit our company.

Jean Younger

Chief Digital Officer, Security Benefit Life Insurance Company

Guarantee reliability by continuously testing and monitoring your automations and the applications they rely on

Proactively ensure automation quality

Test any technology, including desktop, web, mobile, APIs, and packaged applications

Automate tests faster with low-code development

Scope testing more precisely with AI-driven insights and heatmap visualizations

Everything used to be all manual and with this project we achieved close to **90% automation rate in less than 6 months**, which is amazing.

Our deployment cycle used to take two to three weeks, and now **the entire process takes just two to three hours** because UiPath Test Suite has streamlined the way we configure and test.

Sameer Band
SAP Architect

Manage and govern the integrated platform and your automation program centrally at the lowest cost of ownership

1 / 1

One place to manage everything—automations, users, and every platform setting there is

Easily match the right users with the right tools *and* the right permissions—no more no less

Dream platform for your IT—easy to manage, no overwork, fully governable and secure

Manage risk proactively and don't worry about compliance—we've got you covered

From a scalability and a supportability perspective, it's a big game changer for us.

As you start, you want to be able to scale, but you can't spend a ton of money supporting a hundred different platforms. You have to be smart about it, and UiPath for us was a really smart play.

Dave Espinoza,
Director of Transformation

Cloud-first customer choice through flexible SaaS or self-hosted delivery

Split PDF

Overview

The Split a PDF File automation allows you to quickly extract individual pages from a single PDF. It accesses the designated PDF file, extracts each page as its own PDF and renames it with the page number. The automation is great for splitting collated PDF files, quickly renaming a PDF file or grabbing a desired page from a PDF.

UiPath AI Center™

Did you know you don't need to be a data scientist to use machine learning models? AI Center offers more than 25 pre-built ML models for a wide range of use cases. Many of them are pre-trained and can be further customized with your own data.

When you start to use AI in the various ways that UiPath offers, AI Center really broadens the type of process that you can go after from an automation perspective.

David Johnston
Former Manager, Intelligent Automation & Process Excellence, Heritage Bank

The screenshot displays the 'ML Packages / Out of the box Packages' section of the UiPath AI Center. It features a sidebar with navigation options: Home, Datasets, Data Labeling, ML Packages (selected), Pipelines, ML Skills, ML Logs, Automation Hub, Apps, Processes, Data Service, AI Center, Document Understanding, Automation Tips, and Admin. The main content area is divided into two sections: 'UiPath' and 'Open-Source Packages'. The 'UiPath' section includes:

- UiPath Document Understanding:** UiPath models to classify and extract information from images and pdfs.
- UiPath Image Analysis:** Curated Models from UiPath to analyze images.
- UiPath Language Analysis:** Curated Models from UiPath to analyze language in Emails, Documents, Web Pages, Text Messages, Portals and more.
- UiPath Task Mining:** UiPath Task Mining models to analyze captured data.

 The 'Open-Source Packages' section includes:

- Image Analysis:** Models for analyzing images including image classification and image moderation.
- Language Analysis:** Models for analyzing text including language detection, sentiment analysis, and named-entity recognition.
- Language Comprehension:** Models performing cognitively challenging tasks such as text summarization and question answering.
- Language Translation:** Models that use Neural Machine Translation to translate text from one language to another.
- Tabular Data:** Models for analyzing tabular data including classification and regression ML Packages.
- Time Series:** Models working on and predicting time series data.

 The version number 'v21.10.1' is visible at the bottom left of the interface.

UiPath™ Orchestrator

Manage, monitor, optimize, and secure your robot workforce

Lower TCO

through enterprise-scale management that integrates with the systems you already use

Reduce risk

with enterprise-wide monitoring, alerting, analysis, and audit

Grow, and know, your ongoing ROI

with capabilities that seamlessly optimize automation for your people & processes

The screenshot displays the 'UiPath Orchestrator' interface. The main content area shows a table of 'Configured robots' with the following data:

Name	Account type	Robot Type	License Type	DomainUsername
Joe Lasher	Local user	Unattended	N/A	test\testst
Liji Kunmath	Local user	Unattended	N/A	uipath\liji.kunmath

The interface also includes a sidebar with navigation options like Home, My Folders, and Studio, and a top navigation bar with various management tools like Robots, Folders, and Manage Access.

UiPath™ Automation Ops

- Out of the box deployment
- Applies to existing install base*
- Deployed as part of UiPath Automation Cloud
- Tightly connected to Studio and UiPath Assistant
- Oversight and control without intrusion and undue restrictions
- Deployed at organization level, tailored to individual needs

*Provided the existing Studio version is compatible

CoE	Center of Excellency - full access	Studio Pro	1
RPA developers	Full access to all automation features	Studio	1
StudioX Advanced	Advanced Citizen Developers	StudioX	2
Test Automation	QA engineers and Test Automation developers	Studio Pro	2

UiPath Automation Cloud™

1 minute

You can be up and running in less than 1 minute, and focus on automation, not infrastructure.

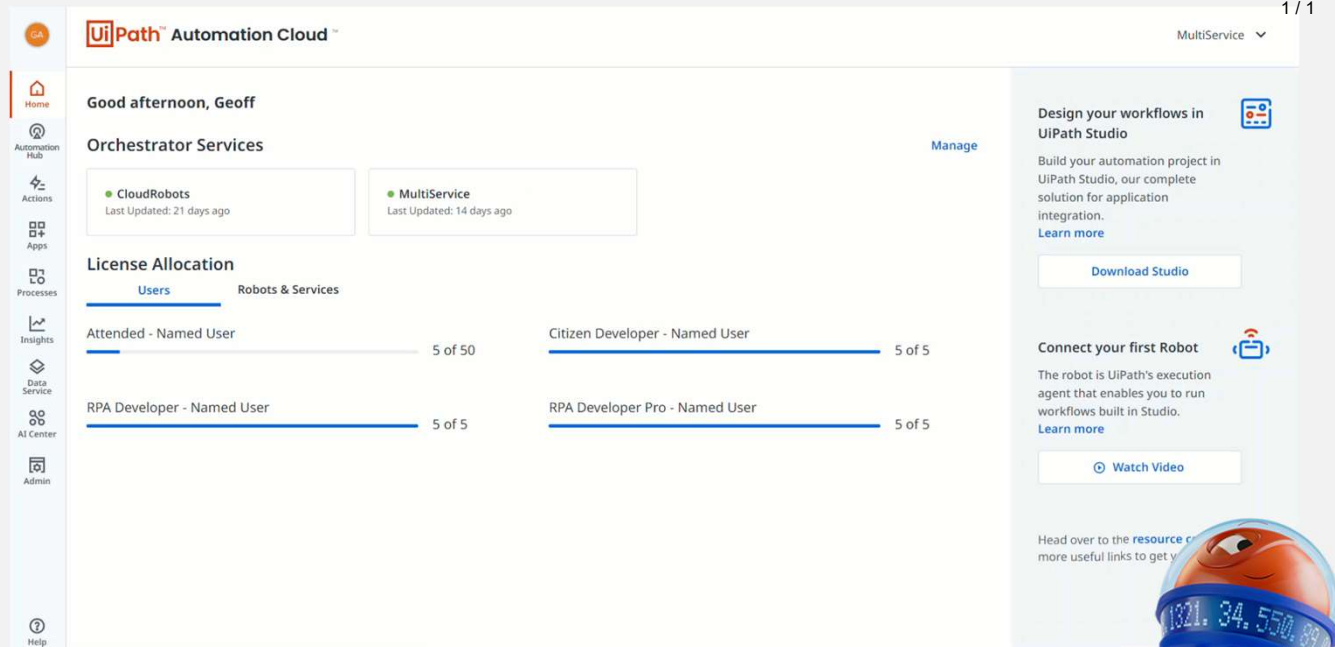

24/7

UiPath Automation Cloud Enterprise offers 24/7 support, an uptime guarantee, and multi-tenant separation of management.

6 regions

Services are hosted in the US, Europe, Japan, Canada, Singapore or Australia, or any combination you need with per-tenant region selection.

ATTESTATIONS FOR CORE PLATFORM SOC 2 TYPE 2, ISO/IEC 27001 AND ISO 9001

“

We moved to the cloud so we can move quickly. We generated 300,000 hours savings in our first year. I want citizen development in every business organization. Every group has automation in their goals and KPIs.”

John Morrison, Director of Technology, Product and Enterprise Platforms & Services, T-Mobile

UiPath™ Automation Suite

Want to run the show?

Automation Suite is “Automation Cloud™ in a box” – the Automation Cloud experience, packaged into a single installer that gives you pre-containerized products, management and infrastructure tools on low-cost Linux.

The other option?

Deploy Automation Suite in your AKS/EKS environment, your managed cloud for storage and for greater control and flexibility.

The screenshot displays the 'License Allocation' page in the UiPath Automation Suite. The page is titled 'License Allocation' and has two tabs: 'Users' (selected) and 'Robots & Services'. The 'Users' tab shows a list of licenses with their current usage and total capacity. The licenses are as follows:

License Type	Usage	Total Capacity
Attended - Named User	0 of 14	14
Attended - Multiuser	0 of 15	15
Citizen Developer - Named User	0 of 15	15
Citizen Developer - Multiuser	0 of 15	15
RPA Developer - Named User	0 of 15	15
RPA Developer - Multiuser	0 of 15	15
Automation Developer - Named User	0 of 15	15
Automation Developer - Multiuser	0 of 15	15
Tester - Named User	0 of 15	15
Action Center - Named User	0 of 15	15
Action Center - Multiuser	0 of 15	15
Insights Designer User	0 of 14	14

On the right side of the interface, there are two promotional cards: 'Design your workflows in UiPath Studio' with a 'Download Studio' button, and 'Connect your first Robot' with a 'Learn more' link. The top right corner shows the user 'DefaultTenant'.

Having all the UiPath products already packaged end-to-end into one installable, containerized solution with infrastructure made installation faster – which means that we can put more time into ramping up the automation discovery processes themselves and delivering benefit to the business sooner.

Nathan Spencer, Citizen Development Program Lead at WPS Health Insurance

Unified Admin

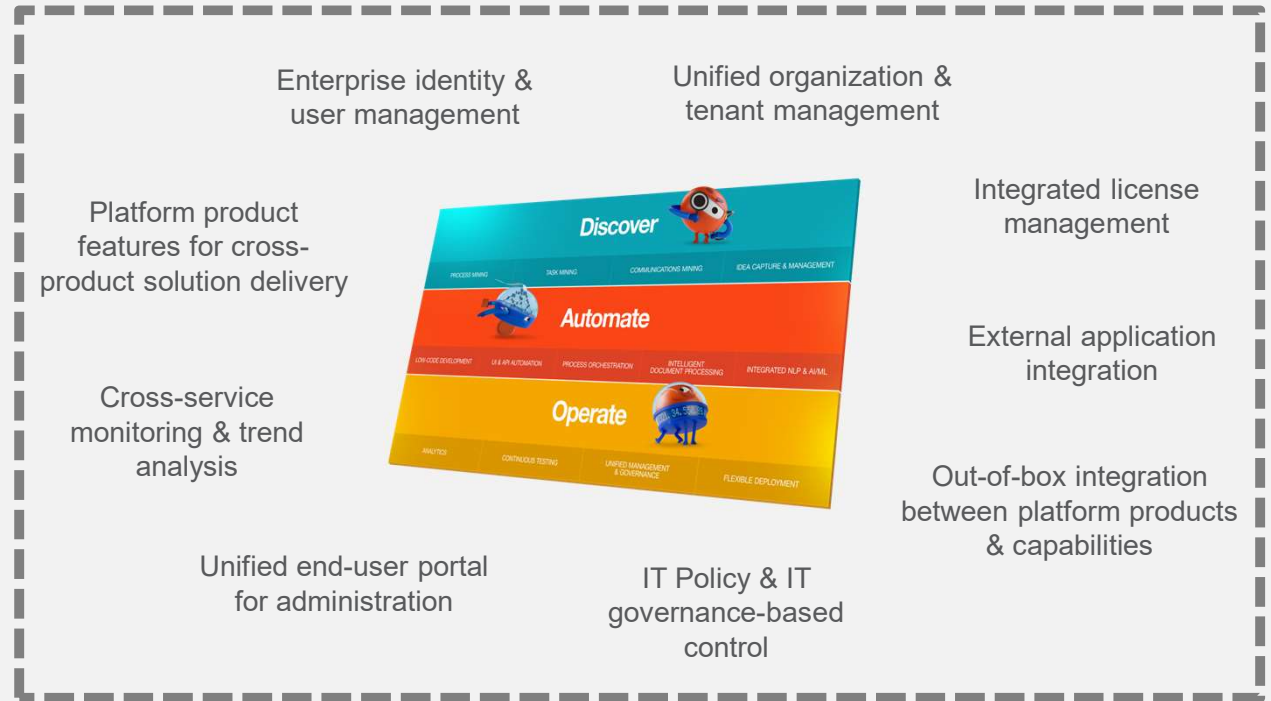

Platform capabilities that span the UiPath Business Automation Platform, whether you choose to deliver it as **Automation Cloud** (SaaS) or **Automation Suite** (Self-hosted).

Plug into your existing enterprise architecture

The UiPath Business Automation Platform is designed to work with what you have already – and make it better.

Get integrated capability, management and governance

A “single pane of glass” offers administration and end user experiences across the platform, so you can manage the whole Business Automation Platform, not a collection of distinct products.

*The vision and roadmap and **open platform architecture** of UiPath and (their) self-awareness to operate with other technologies for our clients to get the most value from automation. **Complete vision of a platform as opposed to a tool...** which is necessary **to automate end-to-end.***

Marshall Seid, Co-CEO and Founder, Ashling Partners

Thank you
