

IA-CONNECT

/JML EDITION

ultima
LABS

Organisations with a **standard** onboarding process experience **50%** greater new hire **retention**

EMPLOYEE LIFE CYCLE CHALLENGES

Complex & Time Consuming

JML processes are becoming increasingly complex due to application sprawl and hybrid environments

Increased Security Risk

Badly managed JML processes can lead to damaging security breaches and risk of data leakage

Poor User Experience

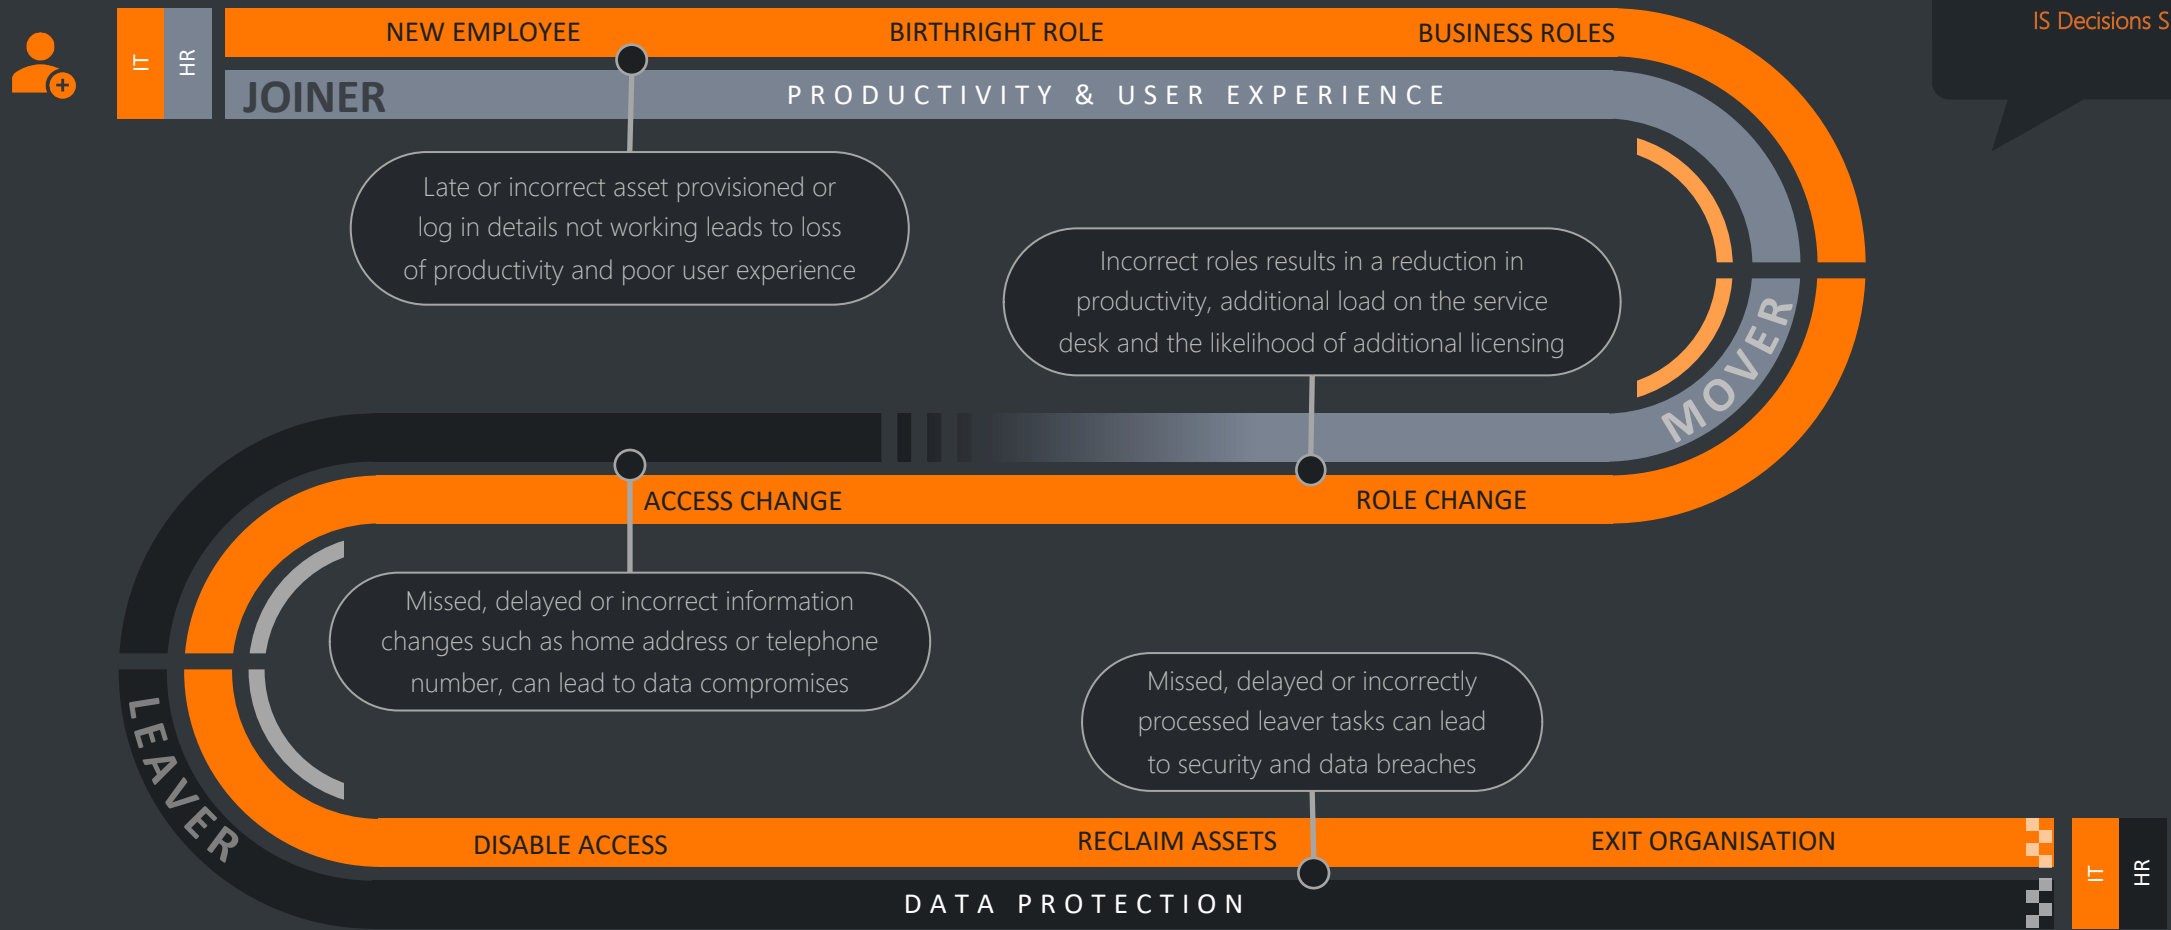

Joiners and movers need instant access to the right resources to be productive, but this is not often the case

Poor Asset Management

Recovering hardware and software licenses from leavers can help to reduce costs through reallocation

EMPLOYEE LIFECYCLE CHALLENGES

“ At least one in three ex-employees are left with access to systems or data after leaving their company ”
IS Decisions Survey

IA-CONNECT

JML EDITION

For **IT teams** who need to improve the consistency and speed of your **joiner, mover and leaver** processes, our platform is a **holistic automation solution** that quickly and easily **automates the user lifecycle**

INTRODUCING IA-CONNECT FOR JML

IA-Connect (JML Edition) is an automation platform which has been built to solve some of the deep-rooted challenges associated with maintaining robust employee lifecycle processes. Our aim is to fortify, simplify and accelerate the automation of your JML processes.

Increased Security Posture

Ensures user rights to your systems are applied correctly and revocation of rights is actioned promptly and reliably

Reduced Cost

Reduces process cost and hands valuable time back to employees to focus on higher value work

Increased Productivity

Gives your employees access to the right systems from day one and reduces productivity lag

Rapid Time to Value

Use IA-Connect's 600+ pre-built actions to quickly and easily build your automated JML processes

HOW DOES IT WORK?

1

Manual process mapping

The existing processes should be mapped out at a high level with any permutations and exceptions.

We can help with this.

2

Turning this into an automated workflow

Tight integration with Microsoft Power Automate makes IA-Connect unique. Workflows are built within Power Automate, augmented by IA-Connect's intuitive Inspector.

And unlike other automation solutions, IA-Connect includes specific, tailored JML-focused actions to make it easy to build your automated JML processes.

3

Automated workflow is made live

Automations are productionised and managed through the standard Power Automate workflow portal.

And as IA-Connect is capable of so much more, non-JML focused workflows can also be built and managed in the same way.

OPTIONS TO SUIT YOU

Just the platform

If you're happy to drive it alone, the IA-Connect (JML Edition) platform can be accessed via a monthly subscription.

This is a great option if you already have Microsoft Power Automate skills in-house.

Accelerator Pack

Our Accelerator Pack includes everything you need to start automating your JML processes. We can help to accelerate the automation of your JML processes with training and development assistance.

Fully Managed

If you're more interested in the outcome than the journey, our consulting and managed service arm can develop your JML processes for you and manage them end-to-end.

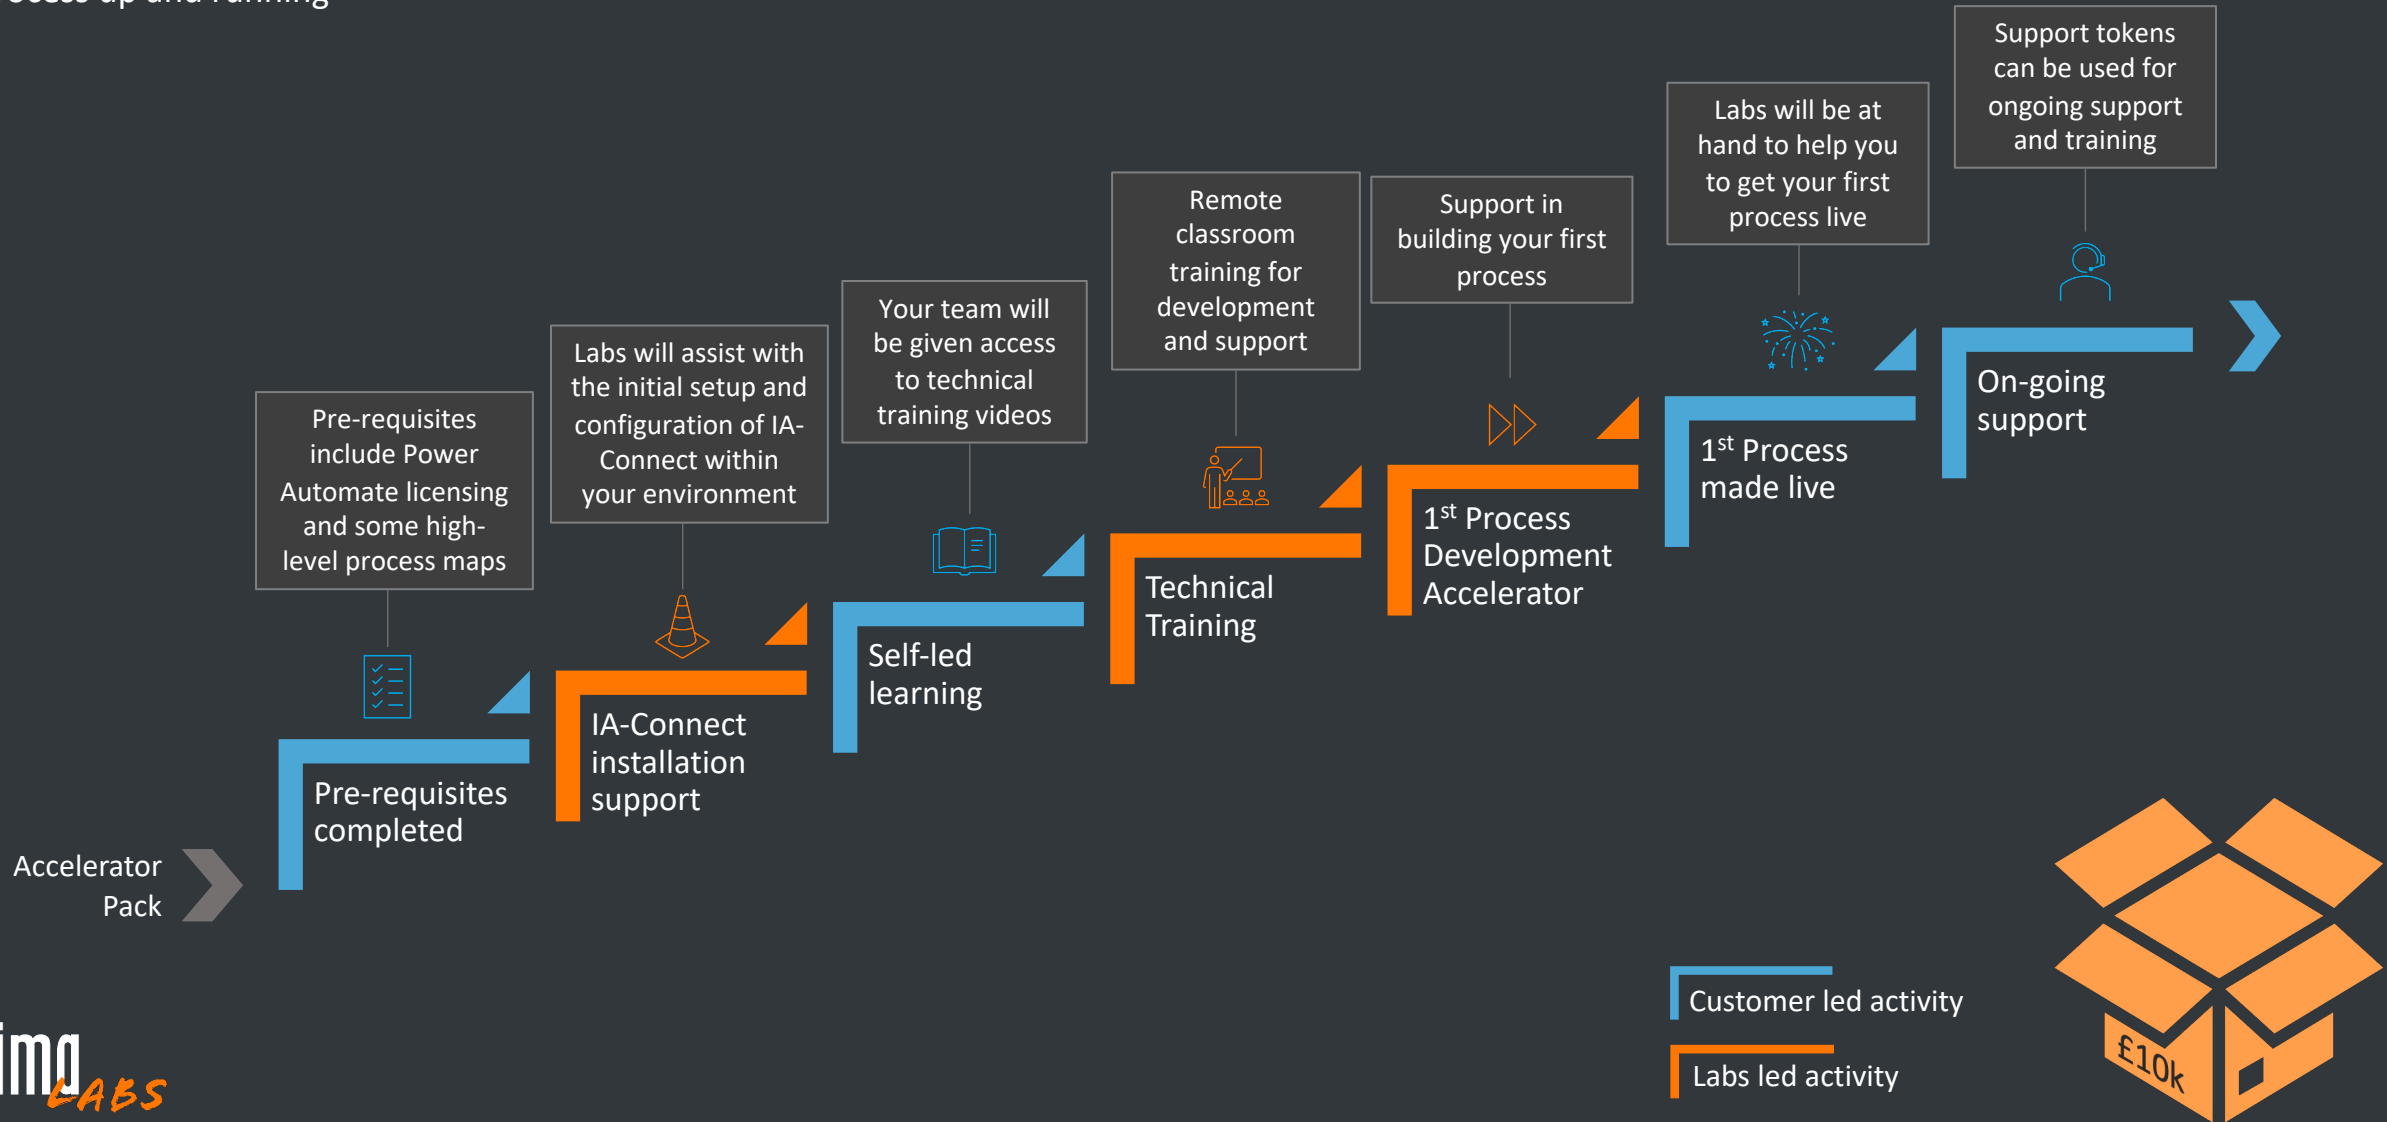

ACCELERATOR PACK CONTENT

ACCELERATOR PACK

The Accelerator Pack prepares you for automating your JML processes plus includes everything you need to get your first process up and running

FULLY MANAGED

1

Manual process mapping

Our experienced Business Analysts will work with your internal teams to map your JML processes end-to-end.

2

Turning this into an automated workflow

We'll use the agreed process maps to develop your processes for you, ready for testing and UAT signoff and go-live.

3

Managed JML

Prior to the process going live, our Managed Service team will onboard your processes and set everything up ready to support you going forward.
