# Free Microsoft 365 Copilot Readiness Assessment

> **"46% of the workforce will continue remote work, highlighting the need for efficient collaboration tools."** *Source: Will AI Fix Work? (microsoft.com)*

Microsoft 365 Copilot is a new and powerful AI tool that will enable organisations to enhance their employees' creativity, productivity and skills particularly when using the core Microsoft 365 Apps; Outlook, Word, Excel, PowerPoint and Teams. Ultima has put together a comprehensive suite of services which are designed to empower customers to unlock the full potential of Microsoft 365 Copilot starting with this complimentary assessment.

This service marks the beginning of your journey towards seamless integration and utilisation of Microsoft 365 Copilot and includes the following benefits:

- Gain an independent view of how ready your organisation is to adopt Microsoft 365 Copilot
- Learn how to go about identifying AI Opportunities within your business
- Learn how and why you need to consider the quality and security of your data
- Learn the end-to-end considerations and process for adopting Microsoft 365 Copilot

**Adoption Strategy:** Change doesn't have to be daunting. We will take you through our recommended Adoption Strategy, which we have followed internally, and which is designed to facilitate a smooth adoption of Microsoft 365 Copilot at a pace that suites you.

**Microsoft 365 Copilot Baseline:** We work with you to build a score based profile of your organisational readiness for adopting Microsoft 365 Copilot.

**Microsoft 365 Assessment**: We examine your usage of Microsoft 365 services and help identify any migration or transition activities required to support Copilot, we also consider options for leveraging data stored outside of Microsoft 365 using 3rd party plugins and Connectors for Copilot that are relevant to your organisation.

**Data Security Assessment**: We assess your data security and data quality management posture and provide recommendations to ensure your information is protected, not overexposed and that the quality of your data is optimised which is key to both maximising the value opportunity of Copilot and in ensuring your data doesn't inadvertently get into the wrong hands through the use of Copilot.
