# Azure Cost Optimization Assessment

Azure Cost Optimization Assessment

Our 2-day Azure platform cost optimization assessment focuses on analyzing current cloud consumption and identifying opportunities to optimize resources and costs.

The Azure Platform Cost Optimization Assessment is designed to provide clients with the information necessary to evaluate their ability to operate their current Azure platform environment in a secure, well-managed and cost-effective manner.

Benefits for you

- Lower total cost of ownership
- Improved efficiency and operational excellence
- Enhanced scalability
- Better customer engagement
- Rock-solid data security

Our team will configure and identify the best solutions to best leverage the flexibility and integrations of the Azure platform to save money.
We will identify areas where you can make changes that will lower your monthly bill. We will also make recommendations on which changes will work best for your specific needs.

Topics to be evaluated:

- Review existing Azure services subscriptions;
- Analyze workload utilization;
- Identify cost savings and areas for optimization;
- Prepare and provide reports on cloud usage and costs optimization;
- Establish monitoring policies to provide for future improvements

Contact us today to learn more about how we can help make your Azure platform deployment more efficient.
