## Architecture

- Front-end – React, HTML5, Material Design

- Back-end server - .NET, MSSQL, MS Azure – public cloud deployment

Solution benefits

- Multi-commodity support – one solution for commodity trading

- Multi-tenancy support – private or shared

- New powerful computation core able to process hundreds of thousands trades per year

- Thin client architecture - open for edge technologies

- Cloud ready – ready for cloud deployment or SaaS = Lowering TCO

- Easy integration not only to BI solutions – REST API
