1. Abstract

CloudAtlas

Powered by UnifyCloud

The **AI Factory** is a centralized portal designed to empower users with access to AIdriven tools and solutions. This user guide provides a comprehensive walkthrough of its functionalities, including navigation, use case exploration, proof of concept creation, and AI policy management. The guide ensures that users of all skill levels can effectively utilize the platform.

2. Introduction

The AI Factory streamlines the process of exploring and deploying AI solutions. It features a user-friendly dashboard, an AI use case gallery, and an AI policies management system. This guide is designed to help users understand the portal's features and maximize its potential in various industry applications.

3. System Overview

3.1 Dashboard Overview

The dashboard functions as a vital central hub for the AI Factory, facilitating efficient communication and management of AI operations.

Fig 1: Dashboard Overview

UnifyCloud[™]

The Features include:

- A left menu for quick navigation.
- Access to AI use case galleries, policies, and deployment options.

3.2 Use Case Gallery Features

The AI Use Case Gallery offers filtering options by **industry domain** or **solution area**.

Figure 4: User Login information

You can enhance your experience by using the left menu to explore the following sections:

- Use Case Gallery Discover a variety of practical applications.
- Al Policies Dashboard Stay informed about our Al guidelines and standards.
- Deployment Status Reports Track the progress of ongoing deployments.
- CloudAtlas Solution Assessment Evaluate solutions effectively with our comprehensive tools.

4.2 Exploring the Use Case Gallery

1. Open the Use Case Gallery from the left menu.

Fig 5: Use Case Gallery

- 2. To enhance your experience, you can filter use cases by:
- Industry domain (e.g., healthcare, finance)
- Solution area (e.g., predictive analytics, automation).
- 3. For more information, simply click on a use case card to explore the details.

4.3 Viewing Case Studies and Demos

1. Select a use case card.

Fig 7: Demo use case demonstration

The demo portal opens up with questions from the bot offering assistance. It will have three preset questions, and if one satisfies your concern, you can choose that option or enter your question.

3. Review the information on costs, industries, and solution benefits.

4.4 Launching a Proof of Concept

1. Click "Launch Proof of Concept" on a selected use case.

UnifyCloud[™]

Fig 8: Proof of Concept

- 2. Complete the validation process by providing basic project details.
- 3. Use the provided interface to upload relevant datasets.

4.5 Creating a Custom Proof of Concept

- 1. Begin by choosing from predefined prompts or take the opportunity to create your own tailored requirements.
- 2. Carefully fill in the necessary details, outlining your objectives, identifying data sources, and specifying any constraints.
- 3. Once everything is in place, submit your project for deployment and move forward with confidence.

4.6 Publishing a Proof of Concept

Follow the four-step process:

- 1. Tailor the deployment settings to meet your specific needs.
- 2. Check and confirm the status of the deployment to ensure everything is on track.
- 3. Take a moment to review the summary of your proof of concept for clarity and insights.
- 4. Conclude the deployment process with confidence, ensuring all steps are finalized.

5. Al Policies Dashboard

5.1 Uploading Policies

Navigate to the AI Policies Dashboard.

UnifyCloud" = AI Factory

Fig 9: POC Launch

Click "Upload" to add a new policy document. After a short time, the data will be ready for use.

FAQs

Q1: How can I access the demo feature?

A1: Navigate to the use case card and click the "Demo" button.

Q2: What should I do if the platform is not responsive?

A2: Check your internet connection and refresh the page. If the issue persists, contact support.

Troubleshooting

Common Issues:

1. Login Errors:

Ensure your credentials are correct. Use the "Forgot Password" option if needed.

2. Policy Upload Failures:

Verify that the file format matches the platform's requirements (e.g., .pdf, .docx).
