

Deliver AI Design Wins with Automated App Modernization

UnifyCloud™

Modernize and Migrate Apps, Databases and Workloads with CloudAtlas for Fast Digital Transformation and AI Design Wins

CloudAtlas helps deliver AI Design Wins with static code analysis scans and assesses applications in a fraction of time a manual assessment would take, generating accurate and expert analysis on cloud readiness, migration options, remediation recommendations, and level of effort for PaaS, Containers, Microservices, Low Code/No Code, IaaS, and more for optimal decision-making, strategy development, and planning. Modernization is accelerated with automated remediation and landing zones, reducing manual effort by up to 80%.

Key Benefits and Capabilities

CloudAtlas automation provides fast and accurate analysis to inform decision-making and speed remediation and migration to help organizations seamlessly modernize and transform.

Fast and Easy Migration Estimates

Automation simplifies and accelerates analytics to mere minutes so you can focus on strategy and planning.

Extensive App Support

Covering the most popular application languages, including .NET, Java, Python, PHP and support for Low Code/No Code modernization.

Clear Modernization Guidance

Static code analysis provides code block and line of code detail, replacement code, and level of effort.

Broad Database Platform Support

Migrate many data platforms - Linux, SQL Server, MySQL, Oracle, MongoDB, MariaDB, Sybase, PostgreSQL, DB2, VMware and SAP.

Automated Remediation

CloudAtlas automates code and schema remediation to reduce modernization effort by as much as 80%.

Complete Control

View and edit existing and updated code, approve and compile modernized code to migrate with confidence.

Reduce Expenses and Downtime

Ensures use of best coding practices, only pay for services used and minimize server downtime.

Safe, Secure and Compliant Migration

Security recommendations and key certification and policies support to manage governance, risk and compliance.

Analysis in Minutes, Not Months

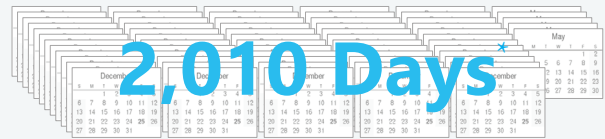

"UnifyCloud's platform allows you to modernize large portfolios of apps and databases in months instead of years and smaller portfolios in hours instead of months"

Jody Roberts, CEO of Northern Data

Delivering AI Design Wins

When it comes to modernizing apps and databases, incorporating new AI services, or developing born in AI apps, UnifyCloud can deliver AI Design Wins via the Solution Assessment Program.

Apps

Modernize to the cloud, incorporate new AI services or develop born-in-AI™ applications to innovate and transform your business.

Databases

Migrate databases to optimize data management, performance, reliability, and cost-efficiency to make sure your data runs effectively at cloud speed.

AI

Programs like the AI Master Class help you identify opportunities to leverage AI to enhance operations, decision-making, and business intelligence.

Fabric Assessments

Leverage Fabric's powerful data integration and analytics capabilities to harness deeper business insights for smarter, faster decisions-making.
