Cybersecurity
Quick-Assessment & Roadmap Definition

Make your business more resilient

Nowadays, organizations are increasingly dynamic, and the pandemic context has accelerated the need for remote access and more agile teams. These rapid changes pose security challenges and the continuous need to understand the exposure level of your business and make it more resilient.

CHALLENGES

- What are the risks my company is taking?
- Are we in compliance with financial and business audits and controls?
- Are employees aware of information security?
- Are technology policies and controls correct and up to date?
- How do I prevent data and information breaches?
- How is my security maturity level compared to other competitors in the industry?

IDEAL SOLUTION

Unipartner Cybersecurity Quick-Assessment determines your risk exposure, includes advice on potential process gaps and action plans, and provides a high-level view of your organization's cybersecurity maturity.

DESIRED OUTCOMES

- Empower users in using Microsoft 365 workloads;
- Best practices for cybersecurity controls, based on successful strategies from proven security and compliance frameworks;
- Identify potentially critical security issues on the organization's technological environment;
- Actionable and quick-fix opportunities to improve security;
- A roadmap for fixing security issues;
- Decision support in improving information security.

Did you know?

"In Portugal, in the first half of 2020, there was a growth of 101% in cyber attacks when compared to the same period of the previous year."
