

Enhance Employee Experience with Viva Connections

Ideate, Design and Try it out

Keep your teams in the flow of work and connected anywhere

Microsoft Viva Connections is a customizable Microsoft Teams application that makes the employee experience more modern. It works as the employee's gateway to access the information and tools they need in their day-to-day, keeping them more engaged and connected with the organization. With our initiative, we intend to hold workshops on Viva Connections and current communication model, assess the existing organization's Intranet, and develop and implement an improvement prototype (POC).

Did you know?

“Organizations with highly engaged employees have 21% greater profitability.”

Gallup: [The Right Culture: Not Just About Employee Satisfaction](#)

CHALLENGES

The current hybrid working model presents challenges for employees. They need to be productive anywhere and continue to feel connected to teams and the organization.

It is necessary to improve access to information, day-to-day applications, relevant teams, communities and training, promoting communication and inclusion.

IDEAL SOLUTION

An Intranet for quick access to day-to-day tools and organization information in a single place. It is possible to contribute ideas, share feedback, and access files, applications, communities, teams, news and training.

It can be developed with Viva Connections which is a customizable app in Microsoft Teams.

DESIRED OUTCOMES

- Conduct workshops on Viva Connections and current communication model (Yammer, SharePoint, Teams);
- Assess the existing organization's Intranet;
- Develop and implement an improvement prototype;
- Implement a change management service to overcome natural human resistance to change.
