

# Empower your workforce with secure virtual workspaces

Unisys Azure Virtual Desktop

## Deploy desktop-as-a-service

The Unisys Azure Virtual Desktop solution is an end-to-end offering that creates secure workspaces for users across various scenarios, including office, remote and travel. It delivers cloud Desktops-as-a-Service, allowing granular control over applications. By harnessing Microsoft products, our solution enhances operational efficiency and seamlessly scales to meet the ever-growing computing demands for artificial intelligence.

By providing a unified digital user experience, the solution also ensures transparent security, endpoint protection and a Virtual Desktop Infrastructure (VDI) with predictable costs.

## Enhanced productivity

The Unisys Azure Virtual Desktop solution delivers seamless access to virtual desktops and apps across devices, improving productivity for remote and mobile workers. This empowers IT leaders with comprehensive cost insights and optimization opportunities while delivering an enhanced, scalable desktop experience across the organization.

## Highlights

- **User experience:** Deliver a consistent Windows experience with Windows 11, Windows 10 or Windows Server. Use a single session to assign devices to a single user, or use multi-session for scalability.

- **Security and compliance:** Strengthen data security and compliance by centralizing applications and data in Azure. Detect threats with intelligent security capabilities and take action.
- **Cost efficiency:** Eliminate the need for on-premises hardware maintenance, offering a pay-as-you-go model for resources.
- **Scalability:** Scale for fluctuating workloads and provision high-performance workloads on demand to meet evolving business requirements.

## How you benefit

- Seamless access to virtual desktops and apps across devices, improving productivity for remote and mobile workers
- Centralized desktops, ensuring data security and compliance
- Reduced licensing fees, maintenance costs and infrastructure expenses
- Detailed view into costs while elevating the desktop experience
